RESOLUTION—No. 615T—A. I.

Minister-in-charge: The Hon'ble Raja Bhupendra Narayan Sinha Bahadur, of Nashipur.

READ—

Annual Reports of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College for the year 1927-28.

I.—Civil Veterinary Department, Bengal.

Mr. P. J. Kerr held charge of the office of the Director of Civil Veterinary Department and Veterinary Adviser to the Government of Bengal, with a short period of absence owing to illness, from the beginning of the year until 23rd September when he proceeded on long leave. Mr. R. T. Davis officiated for him for the remainder of

the year. Rai Sahib S. C. Pal and Babu N. N. Mazumdar, Assistant Directors, were in charge of the Western and Eastern Ranges, respectively, throughout the year.

2. The Director, not without justification, couches his general remarks in a tone of some despondency—want of funds have prevented several important schemes being brought into being, such as the free supply of serum, the appointment of 9 extra Staff Veterinary Assistant Surgeons, and the appointment of a Veterinary Inspector for propaganda work. Nor has it been possible to make any progress with the long-standing question of the revision of the pay of the Veterinary Assistant Surgeons. On the side of local bodies who employ and bear two-thirds of the cost of the subordinate veterinary staff there is too often evident an apparent failure to appreciate the important bearing that the control of epidemic diseases, together with the ordinary care of animals, has on the prosperity of the country. This attitude is reflected also, as the Principal, Bengal Veterinary College, observes, in the steady fall in the number of District Board stipends awarded to students at the college. Consequently, the staff shows little or no expansion and in one case a local body has got rid of the Veterinary Assistant Surgeon whom it had hitherto been entertaining. It must be admitted, however, in all fairness to local bodies, that the increasing calls which are made upon limited financial resources particularly on the side of medical and public health work make it inevitable that they should cut down expenditure somewhere and veterinary interests are not the only ones that have suffered.

A noticeable exception, however, is the Nadia District Board who were enterprising enough to organise a travelling exhibition in which the Veterinary as well as the Public Health and Agriculture Departments took part.

The scheme for thana veterinary dispensaries under the administration of Union Boards, to which reference was made in last year's review, has not yet materialised, as the amendment to the Village Self-Government Act, which was necessary in order to make it possible, had to be dropped after being introduced in the present session of the Legislative Council. The future of the Bill is still, however, under consideration.

3. The year was a mild one so far as epidemic diseases were concerned, but, as Mr. Davis points out, these things go in cycles, and diminution of outbreaks in a particular year is no indication that such diseases are dying out.

The total number of deaths from epidemic diseases was 15,459 as against 35,719 in the previous year. The deaths from rinderpest, which accounted for 76 per cent. of the total, fell from 33,405 to 11,790. Hæmorrhagic septicæmia, on the other hand, showed a slight increase from 1,492 to 1,899. Tippera heads the rinderpest list with 1,611 deaths, closely followed by Chittagong with 1,521, and Mymensingh with 935. The casualties in Khulna and Bakarganj fell from over 4,400 each to 473 and 688, respectively. The deaths in Sodepur Pinjrapole fell from 189 to 142.

During the year 113,757 inoculations were performed as against 206,616 in the previous year, but this was in respect of a number of outbreaks which was less by more than half than that of the previous year. The death rate among inoculated animals was negligible. It is satisfactory to observe that there is very little opposition to inoculation. There was again an increase of patients treated by Veterinary Assistant Surgeons on tour, viz., 169,385 as against 126,661, an increase of over 33 per cent., while the number of cases treated at dispensaries and hospitals rose from 56,184 to 71,159, or by over 26 per cent. (the rate of increase last year was 10 per cent.). These figures indicate that the animal-owner at any rate is appreciating more and more the value of veterinary attendance, and show that there is a need for more dispensaries and a bigger staff. Yet no new hospital or dispensary was opened during the year and there was no increase of staff.

The Hon'ble Minister is glad to note, however, that the Mymensingh District Board have undertaken the construction of a serum cellar at their Sadar Dispensary; that the Pabna District Board have allotted Rs. 12,000 for the construction of a Veterinary Hospital and quarters for the Veterinary Assistant Surgeon at Pabna; and that the Rajshahi District Board have constructed a serum cellar at the headquarters veterinary hospital.

The Department participated once more in the Eastern Bengal Railway Demonstration Train.

4. His Excellency, acting with his Minister, notices with pleasure the names of officers of the Department who did good work during the year and desires also to acknowledge the care and attention which Messrs. Kerr and Davis devoted to their duties.

II.—Bengal Veterinary College.

5. Mr. A. D. MacGregor held charge as Principal throughout the year. Mr. R. T. Davis was Vice-Principal from 1st April up to 22nd September when he was appointed to act as Director, Civil Veterinary Department, and Mr. S. S. Ahmad did Mr. Davis' duties as Vice-Principal up to the end of the year. Rai Sahib Dibakar Dey, the Assistant Principal, was on leave from 5th May to 1st November and in his absence Babu D. K. Sen and Mr. S. S. Ahmad acted for him at different periods.

The Hon'ble Minister records with regret the death during the year of Babu N. L. Mitter, a lecturer and a member of the Provincial Service.

6. The number of students again showed an increase and there were 144 on the rolls at the close of the session as against 125 in the previous year. Of these, 46 were from Bengal as against 32 last year, but the Bihar and Orissa students fell from 66 to 53. The rest included students from Persia, Ceylon, Bhutan, Penang and Iraq. On the results of the annual examinations, the Board of Examiners stated that they considered the results were highly satisfactory and that the students as a whole had been well taught. Though it is a source of satisfaction to have the college well filled with students, it is still more important that there should be sufficient employment for them after they have finished their course, and unless there is an expansion of veterinary activity among local bodies it is to be feared that the employment for all passed students may not be forthcoming.

A four months' training class for farriers and dressers was opened during the year and promises to be popular.

7. During the year 2,561 patients were treated and 469 operations performed as against 2,562 and 374, respectively, last year. The college was self-supporting to the extent that the fees realised from patients just balanced the cost of feed (including both patients and college animals). Fodder crops were again grown successfully and the sale of surplus fodder realised Rs. 2,590, or Rs. 1,000 more than in last year.

The new Dissection theatre, which was opened during the year, will be a valuable addition to the equipment of the college.

Useful work was as usual carried out at the Raymond Research Laboratory, where 138 brains of animals suspected of rabies and many other pathological specimens were examined.

8. The Committee of Management held three meetings during the year, which were, on the whole, well attended.

9. His Excellency, acting with his Minister, notices with pleasure the names of those of the staff whom the Principal mentions for good work during the year and desires to acknowledge also the services of Mr. MacGregor himself.

10. The Minister would conclude this resolution by stating that he has to discharge the duty of reviewing the administration of a year in the policy or supervision of which he had no hand and so naturally he had to proceed on records as he found them. The difficulties of his delicate task have been further enhanced by the fact that he had to undertake this duty even before he had a reasonable time to shape his own policy.

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION UNDER THE ASSAM LABOUR AND EMIGRATION ACT, 1901 (VI OF 1901), FOR THE YEAR ENDING THE 30TH JUNE 1928.

GOVERNMENT OF BENGAL.

Revenue Department.

Emigration.

DARJEELING, THE 29TH OCTOBER 1928.

RESOLUTION—No. 606 T.-R.

READ—

The Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending the 30th June 1928, submitted by the Superintendent of Emigration, Calcutta and the District and Assistant Superintendents of Emigration.

There was an increase in the number of emigrants despatched to the labour districts during the year under review as compared with the previous year.

2. Recruiting operations in Bengal were conducted, as in previous years, in the districts of Bankura, Birbhum, Burdwan and Midnapore and in addition in the district of Murshidabad. The number of garden sardars employed during the year was 512 (including 98 sardarins) as against 340 in the previous year. All worked under the supervision of licensed local agents. The number of local agents' licenses was 11 as compared with 13 issued in the previous year. The total number of emigrants recruited in Bengal was 912 as against 147 in the previous year, the largest number coming from Birbhum, viz., 776. The total number of recruits from Bengal and other provinces embarking at Goalundo was 12,688 (including those recruited in the Bombay Presidency outside the Act) as compared with 11,212 in the preceding year.

3. The rest-houses for emigrants at Asansol, Kharagpur, Naihati and Goalundo maintained by the Tea Districts Labour Association were frequently inspected and their condition was found to be, in all respects, satisfactory.

4. Six deaths occurred among the emigrants on transit, viz., 1 at the halting station at Naihati and 3 at Goalundo, while 2 infants died on the journey between Naihati and Goalundo. No deaths occurred at other halting places. Out of the total number of emigrants who arrived from the different recruiting districts in and outside the Presidency of Bengal, 3 deserted, viz., 2 from Kharagpur and 1 from Goalundo, and 13 were released because they were either physically unfit for labour or unwilling to emigrate. This number included 2 dependents. There was no death or desertion amongst emigrants during their journeys by steamer from Goalundo or by railway from Chandpur to their final destination.

5. In connection with the transport of labour to Assam receipts increased from Rs. 565 in the preceding year to Rs. 697 during the year under review, while the expenditure decreased from Rs. 17,777-7-6 to Rs. 16,756-4. The decrease in the expenditure is due to the fact that, as the work of the Emigration Agency office at Goalundo has diminished on account of the despatch of large numbers of emigrants by rail to Assam *via* the Santahar-Rangya-Amingaon route, owing to the construction of the Lower Ganges Bridge at Sara, the post of the Assistant Superintendent of Emigration and Embarkation Agent at Goalundo has been filled during the year under review by a retired I.M.D. Officer at a lower rate of remuneration than that drawn by the officer on the active list of that department by whom the post was previously filled.

6. Lieutenant-Colonel A. Denham White, I.M.S., held the office of the Superintendent of Emigration, Calcutta, from the beginning of the year up to 11th April 1928, when he proceeded on leave, and Major W. O. Walker, I.M.S., for the remaining period of the year.

The thanks of the Governor in Council are due to them and to the local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

W. H. NELSON,

Secretary to the Government of Bengal (offg.).

REPORT ON THE ADMINISTRATION OF THE EXCISE DEPARTMENT IN BENGAL, FOR THE YEAR 1927-28.

NOTIFICATION.

No. 596T.—A.I.—The 12th October 1928.—The following extracts from the report of the Commissioner of Excise and Salt on the administration of the Excise Department in Bengal, during the year 1927-28, are published for general information.

R. N. REID,
Secretary to the Government of Bengal.

No. 4101 E., dated Calcutta, the 8th August 1928.

From—S. K. RAHA, ESQ., RAI BAHADUR, Commissioner of Excise and Salt, Bengal (offg.),

To—The Secretary, Government of Bengal, Department of Agriculture and Industries.

I have the honour to submit the following report on the administration of the Excise Department in the Presidency of Bengal for the year 1927-28.

4. **Administrative changes and reforms.**—(1) The powers and duties of the Licensing Boards, appointed for the districts of the 24-Parganas, Dacca, Rangpur and Chittagong, were clearly defined and incorporated in statutory rules and orders during the year (vide Notifications Nos. 6492 Ex., 6493 Ex., 6494 Ex., 6495 Ex., 6496 Ex., 6497 Ex. and 6498 Ex., dated the 10th December 1927).

(2) The Licensing Board for the Calcutta Municipality was reconstituted (vide Notification No. 6217 Ex., dated the 25th November 1927).

(3) The rates of duty on, and retail selling price of, ganja were raised, with effect from the 1st April 1928, from Rs. 32-8 to Rs. 40 and Rs. 97-8 to Rs. 105 per seer respectively and those of charas, with effect from the same date, from Rs. 50 to Rs. 70 and from Rs. 140 to Rs. 160 per seer respectively, to check the tendency towards increase in consumption (vide Notifications Nos. 1487 Ex., 1490 Ex., 1493 Ex. and 1496 Ex., dated the 14th March 1928).

(4) The graduated scales of license-fees of country spirit, ganja and charas shops throughout the Presidency were revised, and the revised scales were given effect to under orders of Government with effect from 1st May 1928.

(5) A Committee was appointed by Government early in the year under report for an exhaustive investigation into the present conditions of the consumption of opium in Calcutta and in the industrial centres of Barrackpore and Serampore. The Committee concluded their enquiries and submitted their report to Government in December 1927.

(6) The age-limit for sale of opium was raised from "16 years" to "20 years" (vide Notification No. 4488 Ex., dated the 11th August 1927).

(7) To prevent interprovincial smuggling, the retail price of excise opium in five border shops of the Midnapore district was raised from Rs. 120 to Rs. 130 per seer owing to similar rise in the neighbouring shops of the province of Behar and Orissa (vide Notifications No. 558T.—A.I., dated the 15th September 1927, and No. 614T.—A.I., dated the 24th September 1927).

(8) The sale of weak country spirit of the strength of 75° U. P. was introduced in thanas Fatikchery and Rangunea of the Chittagong district, to check the excessive consumption of illicit liquor by tea-garden coolies (vide Notification No. 785 T.—A.I., dated the 26th October 1927).

* * * * *

5. **Temperance movements.**—Besides the work of the various temperance organisations in Calcutta, specially the Calcutta Temperance Fedaration, reports of temperance movements during the year were received from the following districts :—

(i) *Murshidabad.*—The local missionaries convened a temperance meeting at Saidabad.

(ii) *Dacca.*—A temperance movement was started amongst the Indian Christians in the Joydevpur, Kaliganj and Sadar thanas by local missionary gentlemen. The movement was solely directed against the use of country liquor.

(iii) *Mymensingh.*—It is reported that the aboriginals in the district are trying to give up their habit of pachwai drinking, under the influence of Christian missions and a growing desire to rise in the social scale.

(iv) *Dinajpur.*—Some workers of the Suddhi movement devoted their attention to bring about abstinence from drink among the aboriginal tribes.

(v) *Bogra.*—It is reported that the Hindu Mission of Hili preached temperance among the Santals in the district, as a result of which they were gradually giving up the habit of taking pachwai.

(vi) *Darjeeling.*—It is reported that some newly started temperance associations and some Christian missionaries directed their attention to the cause of temperance, but there was no tangible effect on the consumption of intoxicating articles.

6. **Excise Licensing Boards.**—The *Calcutta Licensing Board* held 5 meetings and adopted the measures indicated below :—

(a) The following licensed shops were abolished with effect from the 1st April 1928 :—1 country spirit, 2 tari, 1 ganja, 1 opium and 1 restaurant. The privilege of "on" sale was withdrawn from one country spirit shop with effect from the same date.

(b) Transfer of sites was approved in the following cases, viz., 4 country spirit, 1 restaurant, 1 siddhi and 1 tari shops.

Transfer of sites was recommended in the following cases, the present sites having been considered unsuitable either for insufficient accommodation or for other reasons, viz., 1 country spirit, 6 ganja, 1 siddhi, 1 charas, 4 opium, 1 tari and 1 foreign liquor public "off."

(c) One new foreign liquor public "off" license and one new restaurant license were sanctioned.

(d) Objections made against the existing location of the following licensed premises were rejected, viz., 8 country spirit, 1 foreign liquor "on," 1 charas, 5 opium and 1 siddhi shops.

(e) Three applications for new foreign liquor public "off" licenses, 3 for new restaurant licenses, 2 for conversion of country spirit "off" licenses into "on" and "off" licenses, 1 for a new ganja license and 1 for a new siddhi license, were rejected.

The Licensing Boards for the Municipalities of Howrah and Bally held one meeting each during the year.

The *Howrah Board* sanctioned the abolition of 1 country spirit and 1 tari shop with effect from the 1st April 1928. Objections against the existing location of 2 country spirit, 3 tari and 1 foreign liquor public "off" shops were rejected by them.

The *Bally Board* effected no change in the number and location of shops during the year. One application for a new foreign liquor public "off" license at Belur was rejected by them.

The *Sadar Licensing Board of the 24-Parganas district* held two meetings. One country spirit and 5 tari shops were abolished on their recommendations.

The *Barrackpore Licensing Board* held two meetings. The Board recommended no alterations in the number and location of the existing licensed premises for the year 1928-29.

The *Dacca Licensing Board* held two meetings. The Board recommended no change in the number of licenses but directed the change of sites of one country spirit shop and one ganja shop.

The *Rangpur Licensing Board* held one meeting. On their recommendations, 2 country spirt, 1 opium and 3 ganja shops were abolished; the sites of 1 country spirit, 1 opium and 1 ganja shop were changed and 1 new tari shop was sanctioned.

The *Chittagong Licensing Board* held one meeting and recommended the conversion of 1 country spirit "on" license to an "off" license and change of site of 1 ganja and 1 opium shop. The first recommendation of the Board was not

accepted while the other recommendation was given effect to.

7. **Excise Advisory Committees.**—In areas other than those mentioned in paragraph 6 above, the local Excise Advisory Committees advised the Collectors as regards the number and location of excise and opium shops. All their recommendations were carefully considered and most of them were accepted.

In accordance with their recommendations, 2 country spirit, 4 tari, 7 pachwai, 1 ganja and 2 opium shops were abolished. Their recommendations for change of sites of 15 country spirit, 10 tari, 13 pachwai, 1 opium and 3 ganja shops were accepted. One country spirit, 2 pachwai, 1 foreign liquor, 3 opium, 2 ganja and 9 bhang shops were newly opened with effect from the 1st April 1928 on their recommendations.

While most of the Advisory Committees showed due discretion and appreciation of existing conditions in their recommendations, a few recommended total abolition of all excise and opium shops from their jurisdictions.

* * * *

The recommendations referred to above for total abolition of all drink and drug shops, in particular localities, were not accepted as total prohibition is not the policy of the Government regarding alcoholic liquors and intoxicating drugs.

8. **Total revenue and charges**

* Excludes cost price of opium, as well as an amount of Rs. 90,060 adjusted on account of excess cost price of opium.

The decrease was mainly due to decreased consumption of country spirit in Jalpaiguri, as well as in several districts of the Burdwan, Presidency and Rajshahi Divisions. The reasons for the decrease in consumption in Jalpaiguri were special, whereas the decrease in the other districts was chiefly due to bad economic conditions resulting from failure of crops, low price of jute, and general depression in trade. The decrease of consumption of country spirit amongst the tea-garden coolies in the district of Jalpaiguri has been fully explained in paragraph 16 of the Report.

9. **Actual receipts.**—Deducting the advance collections (Rs. 1,36,057) for 1928-29 and adding the revenue (Rs. 1,06,352) which was collected in advance in 1926-27, the actual receipts on account of 1927-28 were Rs. 2,23,49,292 against Rs. 2,25,19,571 (after similar adjustment) of the preceding year. To the actual receipts of 1927-28, a sum of Rs. 90,060 may be added on account of adjustment of excess payment in the cost of excise opium supplied to Bengal from 1st November 1925 to 31st March 1927, bringing up the total receipts to Rs. 2,24,39,352.

10. **Excise charges** * * * * * —The total expenditure of the Excise and Salt Department, excluding the cost price of opium payable to the Government of India, was Rs. 15,21,327 during the year, against Rs. 15,29,926 during 1926-27.

11. **Revenue under different heads** * * * * —The largest increase of revenue (Rs. 2,97,459) occurred under "Total receipts from country fermented liquors other than malt liquors." The revenue from "Pachwai" (rice beer) advanced by Rs. 1,53,361, while that from "Tari" by Rs. 1,44,098. Receipts under "Miscellaneous" showed an increase of Rs. 94,674. Receipts from "Commercial spirits" came next with an increase of Rs. 14,298. The largest decrease (Rs. 3,00,238) occurred under the head "Country spirit," followed by a decrease of Rs. 1,49,698 from "Potable foreign liquors," Rs. 39,417 from "Total receipts from hemp drugs" and Rs. 16,588 from "Opium."

12. **Demand and collection** * * * * —Of the gross demand of Rs. 2,24,16,683, a sum of Rs. 2,23,78,997 or 99·8 per cent., was realised. Rs. 15,723 was remitted as irrecoverable. The incidence of excise revenue per head of population was 7 annas 8 pies as in the previous year.

* * * *

SECTION II.—Country Liquor.

COUNTRY SPIRIT.

14. **System of supply and sale.**—There were no changes in the system of supply and sale.

15. **Retail licenses.**—The number of licenses for the sale of country spirit was 931 against 938 in 1926-27, showing a decrease of 7 licenses.

16. **Consumption.**—The total consumption of country spirit in the Presidency amounted to 591,935 L. P. gallons as compared with 627,962 L. P. gallons in the preceding year, showing a decrease of 36,027 L.P. gallons. Consumption decreased in 18 districts and increased in 8 districts. A large decrease of 24,236 L.P. gallons or 34·3 per cent., occurred in the district of Jalpaiguri. Weak spirit of the strength of 75° U.P. was introduced in the tea-garden areas of the district, east of the Teesta, with effect from 1st January 1926, specially with a view to compete with cheap illicit liquor. This led, however, to very excessive drinking amongst the tea-garden coolies and necessitated a substantial increase in the price which was accordingly raised. The Deputy Commissioner has reported that the decrease in consumption was partly due to the increase in the price, and partly to other contributory causes, which were the lower price of jute, and late plucking of tea in the season as well as higher price of paddy, and the abolition of two country spirit shops in the tea-garden areas.

There was a general decrease in the majority of the districts of the Burdwan and Presidency Divisions and was due to the bad economic conditions, owing to the high price of rice and low price of jute as well as to the closure of some rice mills. Several of the districts in North Bengal as well as the districts of Dacca and Faridpur showed decrease in consumption due to economic causes brought about by higher price of rice and lower price of jute, and consequent depression of trade.

The increase, in the districts where it occurred, was nominal, except in Midnapore and in Chittagong. The increase in Midnapore was partly due to the detection of illicit distillation cases in the jungle area of the district. The increase in Chittagong has been attributed to the development of the town as a major port and also to the opening of three shops for sale of a cheap weak liquor of 75° U.P. in the garden areas of the district.

17. **Total revenue from country spirit.**—The total revenue (license and distillery fees and duty) from country

spirit was Rs. 87,58,135 against Rs. 90,58,373, a decrease of Rs. 3,00,238. The revenue derived from duty and distillery fees decreased by Rs. 2,49,678 and that from license fees decreased by Rs. 50,560.

18. **Convictions for drunkenness and action taken against licensees for permitting it.**— * * *

* * * In Calcutta 4,226 persons were convicted of drunkenness as compared with 3,241 persons in the previous year, but no statistics were taken to show what proportions of these cases were due to country spirit, tari and foreign liquor respectively. The Commissioner of Police cannot assign any special reason for this increase. The Magistrate of Howrah reported that the increase in the number of convictions from drunkenness within the municipal limit of Howrah, was due to better detection of cases of drunkenness on the part of the Police.

19. **Distilleries and warehouses.**—There was no change in the number of distilleries. The rates fixed for cost price of country spirit from 1st July 1927 were—(1) Messrs. Carew & Co., Re. 1-12-4 per L.P. gallon; (2) Messrs. D. Waldie & Co., Re. 1-9-9 per L.P. gallon; (3) Messrs. Hajee Ismail Sait & Sons, Re. 1-7-0 per L.P. gallon. These rates continued till the 30th June 1928.

Adequate supply of liquor was generally maintained throughout the year from the distilleries to the bonded warehouses and though on several occasions the stock fell below the prescribed minimum the issues to the "retail" premises were not affected.

TARI.

20. **General.**—During the year under report licenses for the retail sale of fermented tari were settled by auction in the tree-tax as well as in the other areas of the Presidency.

21. **The tree-tax system in Hooghly, Howrah, the 24-Parganas and Calcutta.**—The system worked satisfactorily during the year under report.

22. **Statistics.**—The total receipts under the head "Tari" increased from Rs. 8,34,452 to Rs. 9,78,550. The number of retail licenses decreased from 537 to 519. The bulk of the tari revenue was derived, as in previous years, from the Burdwan and Presidency Divisions and the district of Malda, which altogether contributed Rs. 9,43,342 out of the total revenue of Rs. 9,78,550. The increase in revenue was due to the better working of the tree-tax system as well as the settlement of licensed shops at higher bids during the last auctions in Calcutta and 24-Parganas.

PACHWAI.

23. **Licenses.**—The total number of licenses issued for "retail sale," "home-brew (annual)" and "manufacture of pachwai on special occasions" was 59,980 as compared with 54,952 in 1926-27.

	Number of licenses issued in—	
	1926-27.	1927-28.
Retail sale	1,201	1,186
Home brew (annual) ..	52,992	58,784
Manufacture on special occasions.	759	1,057

The increase in the number of licenses permitting "home brew" of pachwai was due mainly to increase in the number of such licenses in the district of Jalpaiguri, where under a special system such licenses are issued to the tea-garden labourers by the managers of the gardens.

24. **Revenue.**—The revenue in license fees from "retail vend shops" increased from Rs. 10,05,382 to Rs. 11,50,854. The increase was marked in Burdwan (Rs. 1,03,325), Birbhum (Rs. 21,808), Bankura (Rs. 16,392), and Midnapore (Rs. 15,487), while there was a decrease of Rs. 13,848 in Murshidabad. The increase in revenue in Burdwan, Birbhum and Bankura was mainly due to increase in consumption owing to the close supervision over pachwai shops, as well as more frequent sampling of diluted pachwai for strength. In Murshidabad the low class Hindu and Santal cultivators were the chief consumers of pachwai. As the cultivator classes were practically out of employment owing to drought there was fall in consumption as well as in revenue.

25. **Consumption.**—The consumption in the districts of Burdwan, Birbhum, Bankura, Midnapore and Hooghly where the Bengal fixed fee system was

in operation from previous years and accurate figures of consumption from the licensed shops were available, amounted to 217,355 maunds of rice against 201,982 maunds of rice during the previous year as detailed below :—

The fixed fee system was introduced in the pachwai shops of the Murshidabad district during the year under report and the consumption in that district amounted to 8,778 maunds of dry rice.

	Maunds of rice.	
	1926-27.	1927-28.
Burdwan	97,101	107,615

Hooghly	12,522	12,645
Murshidabad	....	8,778
	2,01,982	2,26,133

Out of 1,186 licenses in the Presidency for the manufacture and vend of pachwai 926 worked under the fixed fee system during the year under report.

26. **Control over manufacture and sale of pachwai and of bakhar.**—The control over the manufacture and sale of pachwai was made increasingly effective in all the districts where the fixed fee system of licensing was in force. The Collectors have reported that considerable improvement has been made in the strengths of diluted pachwai, due to frequent sampling of pachwai by the Ebullioscope. Neatness and cleanliness in manufacture were enforced by personal instructions of inspecting officers. The quality of bakhar used was improved by elimination of undesirable and unskilful manufacturers as far as possible, and close supervision was exercised both over the manufacture and sale by the executive staff.

The consumers are generally getting accustomed to the prescribed strengths and cases of overdilution are reported to inspecting officers. Several of the worst cases of overdilution of pachwai by licensees were dealt with by cancellation or non-renewal of licenses.

27. The number of licenses issued for the manufacture and sale of bakhar during the year were as follows :—

	Number of licenses issued	
District.	Manufacture and sale of bakhar.	Sale of bakhar.
Burdwan	6	8
Birbhum	15	7
Bankura	19	10
Midnapore	73	....
Hooghly	....	2
Murshidabad	2	3

The number of licenses issued in Birbhum for the manufacture and sale of bakhar was further curtailed during the year. The Superintendent of Excise, Birbhum, Mr. D. N. Mukherjee, continued his investigations regarding "bakhar" during the year, and the question of further control over the manufacture and sale of "bakhar" is under consideration at present.

30. **Free brew of pachwai on special festivals.**—The concession of "free brew" of pachwai was permitted as in previous years to the aboriginal tribes in Burdwan, Birbhum, Bankura and Midnapore during special festivals.

SECTION III.—Foreign liquor.

32. **Import from foreign countries and clearances.**—The following statistics furnished by the Collectors of Customs show clearances of foreign liquor on payment of duty from the Custom Houses in Calcutta and Chittagong :—

The Collector of Customs, Calcutta, has commented on the statistics for the Port of Calcutta in 1927-28 as follows :—

"The public taste in liquors is singularly conservative and the demand responds very little to change in price.

Beer, whisky and brandy, the three drinks most in demand, were imported during 1927-28 in very much the same quantities as in the year 1907-08 nor have any of these quantities shown very large fluctuations in the intervening years except in the case of beer. During the War when brewing in the United Kingdom was restricted, imports were naturally reduced but this beverage has steadily regained its popularity and the record figure of 1912-13 has now been exceeded. This is mainly due to the improvement in quality of the light beers brewed in the United Kingdom for tropical consumption and the import of British beers during the year amounted to 706,000 gallons. Japanese beers continued to lose ground, the imports being only 53,000 gallons as against 475,000 gallons during the year after the War. Imports of German beers have also fallen during the year from 352,000 to 316,000 gallons, but Dutch beers have improved from 31,000 to 35,000 gallons.

"There have been no noteworthy fluctuations under any of the other heads."

The following statistics show imports and issues of spirits in L.P. gallons at the Calcutta Custom House:—

33. **Import and manufacture of Indian made brandy, whisky, gin and rum.**—The figures below show the total quantity of spirit used in the manufacture of brandy, whisky, gin and rum in Bengal, as well as the imports thereof from other provinces:—

Figures of 1926-27	7,133	18,600	25,733

Besides the above, 39·8 L.P. gallons of rum were imported from the Dyer Distillery, Lucknow.

34. **Manufacture of beer.**—Two brewing licenses were issued during the year under report. But only the Victoria Brewery at Sonada worked, yielding an outturn of 17,028 gallons, of which 12,286 gallons were sold to the Military authorities, 1,987 gallons to the public and 2,755 gallons to the provinces outside Bengal.

35.. **Duty on Indian made potable foreign liquors and beers.**—The duty on potable spirits and beer manufactured in India amounted to Rs. 4,18,899 against Rs. 5,90,177 and Rs. 7,53,882 in the two previous years. The decrease during the year under report was partly due to the preference shown by consumers of the cheap brands of foreign liquor, for the imported article in place of the article manufactured locally, as well as to the fact that there being no fixed standard sizes for bottles of the imported article, the locally manufactured stuff could not successfully compete with the cheap foreign stuff which was imported in small-sized bottles. This question is under separate consideration.

36. **Licenses and fees.**—The total number of licenses issued for "Trade" and "Public" vend was 1,610 against 1,582 in the preceding year. The increase occurred under "Trade" (3), "Retail off" (2), "Hostels, etc." (3), "Railway refreshment room" (1), "Canteen" (2), "Late closing" (22), while a decrease occurred under "Temporary bars" (5).

The total receipts from license fees on foreign liquor licenses, levied under the Bengal fixed fee system, were as follows :—

			Rs.
1923-24	..	..	2,74,698
1924-25	..	..	3,05,907
1925-26	..	..	2,95,784

MEDICATED WINES.

37. **Licenses and revenue.**—The number of licenses for the retail sale of medicated wines was 222 against 189 in the preceding year. The revenue from license fees was Rs. 7,225 against Rs. 10,615 in the previous year showing a decrease of Rs. 3,390. The decrease was due to larger realisation of license fees in advance during the year 1926-27.

II.—INDUSTRIAL SPIRITS (EXCLUDING DENATURED SPIRITS).

38. **Revenue.**— The total revenue derived from rectified spirit and absolute alcohol used for medicinal, scientific or other industrial purposes in the Presidency was Rs. 5,22,413 against Rs. 5,00,895 in the previous year.

39. **Issue of rectified spirit from distilleries and warehouses.**—The following quantities of rectified spirit were issued during the year for medicinal, industrial and scientific purposes from distilleries and excise warehouses in Bengal :—

Place of manufacture.	Duty free issues to Government Departments, Colleges, &c., (L. P. gallons)	For manufacture of tinctures and other medicinal preparations (L. P. gallons).

Total ..	8,532	128,041	8,697

Besides the above, 164·6 L.P. gallons of rum were issued, duty free, from the Konnagar Distillery for use in hospitals and 20·5 L. P. gallons from the Russa Distillery to the Deputy Commissioner, Naga Hills.

Duty free issues of rectified spirit and absolute alcohol, as shown in column 2 above, were made to the following institutions :—

Indian Medical Store Depot.
Zoological Surveyor of India.
Officer-in-charge, Mathematical Instrument Office
School of Tropical Medicine.
Dacca University.
Bethune College.
Calcutta Corporation.
Mines Board of Health.
Deputy Controller of Stationery and Stamps.
Assistant Director of Agriculture, Dacca.
Civil Surgeon, Champaran.
Head Chemist, Excise, Bengal.

40. **Manufacture of tinctures and medicines.**—Six bonded laboratories in Calcutta and one in Konnagar continued to manufacture tinctures and medicinal preparations during the year under report; 60,888 L.P. gallons of rectified spirit contained in tinctures and medicinal preparations were issued from the seven laboratories on payment of duty against 60,466 L.P. gallons issued during the year 1926-27. The duty realised on tinctures issued from bonded laboratories at Rs. 5 per L. P. gallons on the spirit contents were Rs. 3,04,440 against Rs. 3,02,330 in the preceding year. Medicinal preparations containing 21,556 L.P. gallons of spirit were issued, duty free, to the charitable dispensaries and hospitals in the various provinces in addition to 6,283 L.P. gallons of rectified spirit and 1,607 L.P. gallons of absolute alcohol. Sixty-six L.P. gallons of rectified spirit and 217 L. P. gallons of absolute alcohol were issued, duty free, to the following institutions from the Konnagar Laboratory :—

Calcutta Corporation.
Scottish Churches College.
Zoological Laboratory.
Presidency College.
Director of Agriculture, Behar and Orissa.
Thomson Engineering College, Roorkey.
Chief Chemist, Marhaura Distillery (Behar and Orissa).
Hygiene Institute, Lucknow.
Calcutta Research Tannery.
Military Food Laboratory, Kasauli, Punjab.

Permit-holders in Bengal took supplies of 18,062·5 L.P. gallons of rectified spirit and absolute alcohol from the distilleries and bonded laboratories on payment of Rs. 90,312-8, as duty.

Besides 154·8, 142 4 and 75·2 L P. gallons of rectified spirit and absolute alcohol were supplied to permit-holders in Assam, Behar and Orissa, and United Provinces, respectively on payment of duty in those provinces

The latest rules enforcing strict adherence to prescribed B.P standards and approved recipes, have decidedly helped in the healthy growth of the pharmaceutical industry It is a matter of satisfaction that bonders are paying much greater attention to quality Many of them have already well equipped analytical laboratories and important preparations are often sent by them to the School of Tropical Medicine for physiological test and standardization at their own cost The working of the bonded laboratories during the year was, on the whole, satisfactory.

41. **Issues of rectified spirit and absolute alcohol from bonded laboratories and distilleries for medicinal, industrial and other purposes on payment of full duty.**—Six thousand nine hundred and eighty-five L P gallons of rectified spirit and absolute alcohol were sold on payment of full duty from the distilleries and bonded laboratories, for industrial, medicinal and scientific purposes to licensed chemists, druggists, etc

SECTION IV.—Hemp Drugs.

GANJA.

47. **Retail licenses.**—The total number of licenses issued in the Presidency for the retail sale of ganja was 1,208 against 1,218 in 1926-27. Under the orders of the Licensing Boards 2 shops were abolished in Calcutta, 3 in Chittagong and 4 in Rangpur.

A new shop was opened in the district of Nadia on the recommendation of the Excise Advisory Committee. One shop, each in the districts of Jalpaiguri and Malda, was abolished as being unnecessary.

48. **Consumption.**—The total quantity of ganja consumed in the Presidency amounted to 1,670 maunds 21 seers against 1,691 maunds 38 seers, showing a net decrease of 21 maunds 17 seers or 1·2 per cent.

The consumption fell in 16 districts and increased in 10 districts, viz , Midnapore, 24-Parganas, Calcutta, Khulna, Mymensingh, Chittagong, Noakhali, Jalpaiguri, Rangpur and Bogra. The increase in Khulna and Noakhali was nominal while in the other districts it ranged from 6 to 3 04 per cent

49 **Total revenue.**—The receipts for the year amounted to Rs 46,86,329 against Rs 47,67,560 in the previous year, the net decrease being Rs. 81,231. The revenue from license fees decreased by Rs 60,693 and that from duty by Rs 20,918 while that from gola rent increased by Rs 380.

50 **Incidence of taxation.**— The incidence of license fee per seer of ganja consumed was Rs. 36·2 and that of duty Rs 32 5 The total taxation was Rs. 68 7 per seer, as compared with Rs 68 7 in the previous year

* * * *

53. **Cultivation and outturn of ganja at Naugaon in Rajshahi.**—The following figures indicate the position regarding the operations of ganja cultivation in Naugaon in Rajshahi district during the last six years —

Year	Number of cultivators licensed	Area licensed	Total outturn	Average outturn per bigha		Total exports from Naugaon
		Bighas	Mds	Mds	Srs	Mds
1922 23	3 033	2 899	4 761	1	25	4,723
1923-24	3 681	2 809	8,641	2	38	3 935
1924 25	3,310	2 002	6 689	3	13	4 252
1925-26	3 099	1 761	4 598	2	24	4,961
1926-27	2 996	1 800	5 256	2	16	4 722
1927 28	3 010	1 796	6 073	3	15	4 709

The area sanctioned for cultivation during the year 1927-28 was 1,800 bighas and the average outturn per bigha was more satisfactory than in any of the preceding years.

There was no case of surrender of any license and no license was cancelled during the year. The area actually cultivated was 1,798 bighas 6 cattahs and 4 chittaks against 1,812 bighas 11 cattahs and 1 chittak of the last year.

The prospect of the ganja was on the whole good till the second week of December last when the cessation of rain for a considerable period caused the spread of red spider and white ants on the ganja fields. Scarcity of water was keenly felt but was partly met by artificial irrigation. The rain during the latter part of January did some good to the standing crop. Some damage was done to the crop by insects and by plant diseases commonly known as "Hitkali" and "Amballa." The outturn of ganja notwithstanding the scarcity of water, was satisfactory As I remarked in my report for the year 1926-27, the assurance of a proper price has increased the interest of individual cultivators to get as good an outturn as possible from the area cultivated.

BHANG.

58. **Licenses and revenue.**—The total number of retail licenses for the sale of bhang was 316 against the same number during the previous year. The total number of druggists' permits issued was 550 against 518 in the previous year. The total revenue from license fees and and duty amounted to Rs. 2,03,251 as compared with Rs. 1,85,310 in 1926-27 —an increase of Rs. 17,941.

59. **Consumption.**--The principal demand for bhang was confined to most of the West Bengal districts. In most of the districts in East Bengal, the demand for its use as an intoxicant is very small. The total consumption in the Presidency amounted to 427 maunds 10 seers against 407 maunds 19 seers in the previous year - an increase of 19 maunds and 31 seers. The consumption increased generally in almost all the districts of the Presidency. To some extent this increase may be due to a substitution of this intoxicant for ganja which is a much more potent as well as a dearer drug than bhang. (In Calcutta or 24-Parganas increase was not more marked than in many other districts.)

60. **Exports.**—Three maunds of duty paid bhang were exported from Hooghly to French Chandernagore against 3 maunds and 10 seers in the previous year. Twenty seven seers of duty paid bhang were issued from Comilla to the adjacent State of Tripura, against 21 seers in the previous year.

61. **Abuse.**—No case of abuse of medicinal preparations prepared from bhang was reported during the year.

CHARAS.

62. **Licenses and revenue.**—There were 34 retail licenses for the sale of charas in the year under review against 34 in the previous year. The total number of wholesale licenses was 3 against 3 in the preceding year. The total receipts amounted to Rs. 3,26,948 as compared with Rs. 3,03,105 in 1926-27 an increase of Rs. 23,843. There was an increase of Rs. 19,185 under the head "License fees" and Rs. 4,658 under the head "Duty" due to increase in the consumption of the drug in retail shops by 5 maunds and 19 seers in the year under report.

63. **Import, export and consumption.**-The total quantity of charas imported into the Presidency was 71 maunds and 30 seers against 65 maunds and 30 seers in the previous year. The drug was, as usual, imported by the wholesale dealers of Calcutta and Birbhum direct from the Punjab and supplied to the retail vendors in the districts. The total issue to retail shops in the Presidency was 69 maunds and 37 seers as compared with 64 maunds and 18 seers in the preceding year, while the consumption in Calcutta amounted to 42 maunds and 14 seers against 40 maunds and 32 seers in the previous year.

With a view to check the increase in the consumption of the drug which is more potent than ganja or bhang, the Government have increased the retail selling price of the article from Rs. 140 to Rs. 160 per seer with effect from 1st April 1928.

Two maunds and 10 seers of charas were exported to French Chandernagore during the year against 1 maund and 4 seers exported during the previous year.

SECTION V.—Opium.

64. **Restricted supply of opium.**—There was no change in the system of restricted supply of opium to shops in several districts in the Presidency.

65. **Consumption.**—The consumption of excise opium during the year under review was 994 maunds and 18 seers, as compared with 994 maunds and 32 seers in the preceding year.

Analysing the figures of consumption, district by district, it appears that consumption increased in 16 districts and decreased in 11. The increase was normal in most of the districts. It has been reported by the Collectors of Dacca and Tippera that the increase in these districts was mostly due to its larger use amongst older people on account of its medicinal properties.

66. **Licenses for retail sale.**—The total number of licenses issued for the retail sale of excise opium was 854, as compared with 861 in the previous year. Seven shops were abolished, viz., 1 each in Calcutta, Murshidabad, Khulna, Mymensingh and Rangpur, and 2 in Bakarganj. No new shop was opened.

67. **Permits and licenses under the Opium and Morphia Rules.**—The total number of permits and licenses issued was 1,547 as compared with 1,457 in the previous year. The number includes 34 licenses issued to manufacturing chemists, 598 to dispensing chemists, 59 to kabirajes and hakims, and 66 permits to permit holders (total 757 for intoxicating drugs), and 40 licenses issued to dealers, 620 to chemists, 44 to persons approved under Rules 21 (*1*) and 21 (*2*) of the Morphia Rules and 86 to persons authorised under Rule 22 of the same rules (total 790 for morphia drugs). The increase in the number of licenses was due to increase in the number of chemists and druggists in many districts in the Presidency.

68. **Revenue.**—The total receipts amounted to Rs. 47,98,712 as compared with Rs. 48,15,300 in 1926-27.

69. **Abuse of opium and morphia.**—The use of morphia as a substitute for opium does not appear to have been prevalent in any district. The Calcutta Opium Enquiry Committee looked into the practice of administering opium to children and the result of their enquiry has been embodied in their report. The report of the Committee is now under consideration of Government.

SECTION VI.—Cocaine.

72. **Licenses and revenue.**—Four hundred and fifty-five licenses were issued during the year to chemists and druggists for the sale of cocaine on prescriptions of qualified medical practitioners as compared with 420 in 1926-27. Seventy-one permits for the possession of cocaine were issued free to managers of hospitals or dispensaries not under Government supervision. Sixty permits were issued to qualified medical practitioners and dentists.

73. **Preventive operations and illicit transactions** in cocaine have been dealt with in paragraph 75, Section VII of the Report.

SECTION VII.—Offences against the Excise and Opium laws.

75. **Prosecutions and convictions.**—The prosecutions and convictions during the year did not show much noticeable fluctuation in regard to the number of cases and persons prosecuted and convicted, as the figures below would indicate:—

	1926-27.	1927-28.
Number of cases		
Prosecuted	5,796	5,898
Convicted	5,498	5,622
Number of persons		
Prosecuted	6,134	6,179
Convicted . ..	5,546	5,500

The increase in the number of persons prosecuted was noticeable in Calcutta (317), Hooghly (131), and Murshidabad (87). The main heads, under which the increase occurred in these 3 districts, were illicit manufacture of country spirit, tari and pachwai, and in Calcutta, illicit trade in cocaine in addition.

The decrease in the number of persons prosecuted was marked in Midnapore (254), Burdwan (112), Dinajpur (64) and Bankura (52).

The situation regarding excise offences in the Presidency was clearly explained by me in paragraphs 74 to 77 of my report for the year 1925-26 and the course and method of illicit practices in intoxicating articles continued to be the same during the year under report.

The departmental officers successfully tackled offences under the Excise and Opium laws and regulations in most of the districts, and considerable help and co-operation were received from the Police and Customs officials towards the detection of excise offences. The

arrangement regarding the division of work in Calcutta by the Excise Detective Staff, the Police and the Customs officials continued to work with success during the year under review.

The total seizures of opium throughout the Presidency were as follows during the last 3 years :—

		Mds.	Srs
1925-26	..	44	8
1926-27	..	60	22

ONE-YEAR AND TWO-YEAR PROBATIONERS.

(7) **Sub-section 1.**—Each candidate will offer for examination the vernacular shown in column 2 against his province in the following table unless he is already familiar with it or with a language closely allied to it. A probationer assigned to Madras who is familiar with one only of the vernaculars named will offer the other.

Col. 1	Col. 2.	Col. 3.
Madras	Tamil or Telugu	....
Bombay	Marathi	Urdu.
Bengal	Bengali	....
United Provinces	Urdu	....
Punjab	Urdu	....
Burma	Burmese	....
Bihar and Orissa	Hindi	Bengali.
Central Provinces	Hindi	Marathi.
Assam	Bengali	....

Sub-section 2.—A candidate who is not required by sub-section (1) to offer a vernacular named in column 2 will offer the vernacular named in column 3 against his province if any such vernacular is named unless he is already familiar with the vernacular there named or with a closely allied one.

Sub-section 3.—A candidate who is not required under the preceding sub-sections to offer a vernacular will offer history instead. A one-year probationer will offer British history; a two-year probationer will offer British history for the intermediate examination and European history for the final examination.

Any question as to the interpretation and application of this regulation will be decided by the Civil Service Commissioners.

(8) The ordinary session of the Final Examination for the testing of riding will take place in advance of the rest of the Final Examination, and a special session will when necessary be held at a later date for the benefit of any candidate who may have failed at the ordinary session.

Candidates who at the ordinary session satisfy the Commissioners that they are sufficiently at home in the saddle for the efficient performance of all duties required of members of the Indian Civil Service will be awarded marks ranging between 101 and 200 according to the degree of proficiency displayed.

Candidates who at the ordinary session fall short of this adequate proficiency but show such minimum proficiency as is evidence that with a moderate amount of practice they can attain full proficiency, will receive marks ranging between 1 and 100; they will be allowed to proceed to India and will on their arrival there be subjected to such further tests in riding as may be prescribed by their Local Government.*

*Such candidates will receive no increase to their initial pay until they have passed the further tests in question to the satisfaction of their Local Government.

Any candidate who at the ordinary session fails to show a minimum proficiency will be examined again at a special session. If he then attains adequate proficiency he will not be subjected to further tests in India. If he attains minimum proficiency he will be allowed to proceed to India under the same condition as if he had attained minimum proficiency at the ordinary session. No credit in marks will be given for any performance at a special session.

Probationers may also be examined in riding at such time or times as the Commissioners may appoint during the course of the probationary period.

(9) Such deductions as the Civil Service Commissioners may consider necessary will be made from the marks assigned to candidates at the Intermediate and Final Examinations in order to secure that no credit is allowed for merely superficial knowledge.

(10) The Civil Service Commissioners will prepare lists of the candidates in order of merit; the order for the one-year probationers being based on the sum of the marks obtained by the candidates at the Open Competitive and Final Examinations, the order for the two-year probationers being based on the sum of the marks obtained by the candidates at the Intermediate and Final Examinations.

(11) The selected candidates whose performance in the compulsory subjects* of the Final Examination is such as to satisfy the Civil Service Commissioners, and who have also satisfied the Commissioners of their eligibility in respect of nationality, age, health, character, and conduct during the period of probation, shall be certified by the Commissioners to be entitled to be appointed to the Indian Civil Service, provided that they shall comply with the regulations in force at the time, for that Service.

(12) If any candidate is prevented by sickness or any other adequate cause from attending the Final Examination, the Commissioners may, with the concurrence of the Secretary of State for India in Council, allow him to appear at the Final Examination to be held in the following year, or at a special examination. A selected candidate absent for such adequate cause from the Intermediate Examination may under similar conditions, be allowed to appear at the Intermediate Examination a year later or at a special examination, or may be excused the Intermediate Examination and allowed to appear for the Final Examination in regular course.

Any candidate who at the Intermediate Examination shall appear to have wilfully neglected his studies, or to be physically incapacitated for pursuing the prescribed course of training, will be liable to have his name removed from the list of selected candidates.

ANNOUNCEMENTS

made by the Civil Service Commissioners with the authority of the Secretary of State for India in Council:—

(*i*) Selected candidates will be allotted to the various provinces upon a consideration of all the circumstnces, including their own wishes; but the requirements of the Public Service will rank before every other consideration.

(*ii*) An allowance of £300 a year, or, in the case of Selected Candidates possessing an Indian domicile, an allowance of £350 a year will be given to any candidate who passes his probation at one of the Universities or other Institutions that have been approved for the purpose by the Secretary of State for India in Council.

In the case of Selected Candidates on probation for one year the allowance will be payable in four equal instalments on the following dates respectively; December 24th after his selection, March 25th, June 25th and after signature of Covenant on appointment to the Service.

In the case of Selected Candidates on probation for two years the allowance will be payable in eight equal instalments, the first on the December 24th after selection, the second to the seventh on the six following quarter days and the eighth after signature of Covenant on appointment to the Service.

The payment of the various instalments of the allowance except the final instalment, and, in the case of the two-year probationers, the instalment payable at the end of the first year of probation, will be conditional on the receipt by the High Commissioner for India, through the authorities of the approved institution, of a certificate that the candidate had fulfilled up to date the requirements of the authorities and shown satisfactory progress.

If an Indian Government Scholar becomes a selected candidate for the Indian Civil Service, his scholarship stipend shall cease to be paid with effect from the 1st October of the year in which he becomes a selected candidate. He may, however, provided he has executed the agreement referred to in (*iii*) below, be granted on, or at any time after, the 1st October, an advance on account of the instalment of the allowance payable on the 24th December.

---

* The compulsory subjects include riding, and a candidate who fails at the end of the period of probation to satisfy the Civil Service Commissioners that he has reached the minimum standard of proficiency in riding will be liable to have his name removed from the list of selected candidates.

The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted except for special reasons approved by the Secretary of State.

N.B.—The Secretary of State for India gives notice that the amount of the allowances will be reconsidered in 1929, with a view to a possible reduction with effect from the instalment payable in December, 1929.

(*iii*) Each Candidate will be required before receiving the first instalment of his allowance to execute an agreement binding himself and one surety jointly and severally to refund all moneys he may have received from the Secretary of State for India in the event of:—

(*1*) his failure to pass the Final Examination within the time prescribed by the Regulations, and to satisfy the Civil Service Commissioners of his fitness for admission to the Indian Civil Service, or

(*2*) his subsequent failure to execute the usual covenant, and to proceed to India, as and when he shall be directed by the Secretary of State for India.

(*iv*) All candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force they may be required to make for the pensions of their families. The stamps payable on these covenants amount to £1.

(*v*) A First Class passage to India will be engaged for Selected Candidates with a view to their proceeding to India after they have signed their covenants.

(*vi*) Candidates appointed to the Indian Civil Service after undergoing one year's probation will be senior to those appointed in the same year after undergoing two years' probation. The seniority of candidates of each class *inter se* will be determined by the order in which their names appear on the lists referred to in clause (10) of the regulations.

(*vii*) A candidate who fails to satisfy the Civil Service Commissioners at the Final Examination held in any year will be definitely rejected unless the Secretary of State in Council shall, after reference to the Civil Service Commissioners, allow him to sit for re-examination in the subject or subjects in which he failed. In general a candidate who is allowed re-examination will be required to forfeit the whole or part of the final instalment of his allowance, but if it appears to the Secretary of State in Council, after reference to the Civil Service Commissioners, that his failure to pass the examination was due to circumstances wholly exceptional and beyond his control, such forfeit of his allowance will not be required.

(*viii*) "Overseas pay" will not be admissible to Indian members of the Indian Civil Service selected at Open Competitive Examinations held in London in 1925 and subsequent years.

No allegation that an Application Form or a letter respecting such Form has been lost or delayed in the post will be considered by the Commissioners unless the person making such allegation produces a Post Office Certificate of Posting. Candidates who delay their applications until the last days will do so at their own risk.*

Acknowledgments of such Application Forms are sent, and any candidate who has filled up and returned the printed Application Form but has not received an acknowledgment of it within four complete days should at once write to the Secretary, Civil Service Commission, Burlington Gardens, London, W.1. Failure to comply with this provision will deprive the candidate of any claim to consideration.

Candidates will be notified in June of the date and place fixed for their viva voce test and of the manner in which the fee (£8) is to be paid. The time-table of the written part of the examination will probably be posted early in July to the address given on the Form of Application, and will contain instructions as to the time and place at which candidates are to attend.

NOTE.

If Open Competitive Examinations for the following Services, viz.:—

Eastern Cadetships in the Colonial Service;
Junior Grade of the Administrative Class in the Home Civil Service,

should be held in 1929 concurrently with the Open Competitive Examination for the Indian Civil Service, candidates duly eligible in respect of age, etc., will be admitted to compete for any two or all three of these Services, subject to the following conditions:—

Pages 79-81.—Substitute the following for Fundamental Rule 45:—

45. A Local Government may make rules laying down the principles governing the allotment to officers serving under its administrative control, for use by them as residences, of such buildings owned or leased by it, or such portions thereof, as the Local Government may make available for the purpose. Such rules may lay down different principles for observance in different localities or in respect of different classes of residences, and may prescribe the circumstances in which such an officer shall be considered to be in occupation of a residence.

45A.—I. This rule applies, with effect from the 1st April 1924, to members of the services and to Government servants holding the posts included in the schedule to this rule and to Government servants who hold in a substantive capacity posts borne on the cadre of the services included therein.

II. For the purpose of the assessment of rent, the capital cost of a residence owned by Government shall include the cost or value of sanitary, water-supply and electric installations and fittings, but exclude the cost or value of the site (including expenditure on its preparation); and shall be either—

(*a*) the cost of acquiring or constructing the residence and capital expenditure incurred after acquisition or construction; or, when this is not known,

(*b*) the present value of the residence.

NOTE.—The cost of restoration or special repairs shall not be added to capital cost or present value, unless such restoration or repairs add to accommodation or involve replacement of the existing type of work by work of a more expensive character.

Provided that—

(*i*) a Local Government may make rules providing the manner in which the present value of residences shall be determined;

(*ii*) a Local Government may make rules determining what expenditure is to be regarded, for the purpose of sub-clause (*a*) above, as expenditure upon the preparation of a site;

(*iii*) a Local Government may, for reasons which should be recorded, authorise revaluation of all residences of a specified class or classes within a specified area to be conducted under the rules referred to in proviso (*i*) above, and may revise the capital cost of any or all such residences on the basis of such revaluation;

(*iv*) the capital cost, howsoever calculated, shall not take into consideration (1) any charges on account of establishment and tools and plant other than such as were actually charged direct to the work in cases in which the residence was constructed by Government, or (2) in other cases the estimated amount of such charges;

(*v*) a Local Government may, for reasons which should be recorded, write off a specified portion of the capital cost of a residence—

(*1*) when a portion of the residence must be set aside, by the officer to whom the residence is allotted, for the reception of official and non-official visitors visiting him on business, or

(*2*) when it is satisfied that the capital cost, as determined under the above rules, would be greatly in excess of the proper value of the accommodation provided;

(*vi*) in assessing the cost or value of the sanitary, water-supply and electric installations and fittings, a Local Government may by rules determine what are to be regarded as fittings for this purpose.

III. The standard rent of a residence shall be calculated as follows:—

(*a*) In the case of leased residences the standard rent shall be the sum paid to the lessor *plus* an addition determined under rules which a Local Government may make, for meeting, during the period of lease, such charges for both ordinary and special maintenance and repairs, and for capital expenditure on additions or alterations as may be a charge on Government and for the interest on such capital expenditure, as also for municipal and other taxes payable by Government.

(*b*) In the case of residences owned by Government, the standard rent shall be calculated on the capital cost of the residence, and shall be either—

(*i*) a percentage of such capital cost equal to such rate of interest as may from time to time be fixed by the Secretary of State in Council *plus* an addition for municipal and other taxes payable by Government and for both ordinary and special maintenance and repairs, such addition being determined under rules which a Local Government may make, or

(*ii*) 6 per cent. per annum of such capital cost, whichever is less.

(*c*) In both cases standard rent shall be expressed as standard for a calendar month and shall be equal to one-twelfth of the annual rent as calculated above, subject to the proviso that, in special localities or in respect of special classes of residence, a Local Government may fix a standard rent to cover a period greater than one month but not greater than one year. Where a Local Government takes action under this proviso standard rent so fixed shall not be a larger proportion of the annual rent than the proportion which the period of occupation as prescribed under Rule 45 above bears to one year.

NOTE 1.—For the purpose of sub-clauses (*a*) and (*b*) above, the additions for both ordinary and special maintenance and repairs shall not include anything for the establishment and tools and plant charges, except to the extent allowed under proviso (*iv*) to clause II.

NOTE 2.—A Local Government may by rule permit minor additions and alterations, the cost of which does not exceed a prescribed percentage of the capital cost of the residence, to be made during such period as the rule may determine, without the rent of the residence being increased.

IV. When Government supplies an officer with a residence leased or owned by Government, the following conditions shall be observed:—

(*a*) The scale of accommodation supplied shall not, except at the officer's own request, exceed that which is appropriate to the status of the occupant.

(*b*) Unless in any case it be otherwise expressly provided in these rules, he shall pay rent for the residence, and such rent shall be the standard rent as defined in clause III above or 10 per cent. of his monthly emoluments, whichever is less.

(*c*) Nothing contained in clause (*b*) above shall operate to prevent a Local Government from—

(*i*) grouping, after the standard rents have been calculated under the provisions of clause III above, a number of residences, whether in a particular area or of a particular class or classes, for the purpose of assessment of rent, subject to the following conditions being fulfilled:—

(1) that the basis of assessment is uniform; and

(2) that the amount taken from any officer shall not exceed 10 per cent. of his monthly emoluments;

(*ii*) taking a rent in excess of that prescribed in sub-clause (*b*) above from an officer—

(1) who is not required or permitted to reside on duty at the station at which the residence is supplied to him, or

(2) who, at his own request, is supplied with accommodation which exceeds that which is appropriate to the status of the post held by him, or

(3) who is in receipt of a compensatory allowance granted on account of dearness of living.

V. In special circumstances, for reasons which should be recorded, a Local Government—

(*a*) may, by general or special order, grant rent-free accommodation to any officer or class of officers, or

(*b*) may, by special order, waive or reduce the amount of rent to be recovered from any officer.

VI. If a residence is supplied with services, other than water-supply, sanitary or electric installations and fittings, such as furniture, tennis court, or garden maintained at the cost of Government, rent shall be charged for these in addition to the rent under clause IV. The tenant will also be required to pay meter hire and the cost

of the water, electric energy, etc., consumed. A Local Government may make rules prescribing how the additional rents and charges shall be determined, and such rules may also authorise the remission or reduction of the additional rent or charge in special circumstances for reasons which should be recorded.

VII. A Local Government may by rule prescribe that this rule shall apply, with effect from any date not earlier than the first of April 1924, to any Government servant or class of Government servants other than those mentioned in the rule.

VIII. Nothing contained in this rule shall so operate as to require payment of rent, for the occupation of residences supplied by Government, by those servants of the Crown in India, who have been exempted from such payment by order of the Secretary of State in Council, or to affect the amount of rent or charges payable by those servants of the Crown in India in whose case the amount so payable is prescribed by the Secretary of State in Council.

45B.—I. This rule applies to Government servants other than those to whom rule 45A applies or is made applicable under the provisions of clause VII of that rule, or than those occupying residences belonging to a State Railway, or rented at the cost of railway revenues.

II. For the purpose of sub-clause (*b*) of clause III, the capital cost of a residence owned by Government shall not include the cost or value of such special services and installations (including furniture, tennis courts and sanitary, water-supply or electric installations and fittings) as it may contain; and shall be either—

(*a*) the cost of acquiring or constructing the residence, including the cost of site and its preparation and any capital expenditure incurred after acquisition or construction; or, when this is not known,

(*b*) the present value of the residence including the value of site.

NOTE.—The cost of restoration or special repairs shall not be added to capital cost of present value, unless such restoration or repairs add to accommodation or involve replacement of the existing type of work by work of a more expensive character:

Provided that—

(*i*) a Local Government may make rules providing the manner in which the present value of residences, including sites, shall be determined;

(*ii*) a Local Government may make rules determining what expenditure is to be regarded for the purpose of sub-clause (*a*) above as expenditure upon the preparation of a site;

(*iii*) a Local Government may, for reasons which should be recorded, authorise a revaluation of all residences of a specified class or classes within a specified area to be conducted under the rules referred to in proviso (*i*) above, and may revise the capital cost of any or all such residences on the basis of such revaluation;

(*iv*) the capital cost, howsoever calculated, shall not take into consideration (1) any charges on account of establishment and tools and plant other than such as were actually charged direct to the work in cases in which the residence was constructed by Government, or (2) in other cases the estimated amount of such charges;

(*v*) a Local Government may, for reasons which should be recorded, write off a specified portion of the capital cost of a residence—

(1) when a portion of the residence must be set aside, by the Government servant to whom the residence is allotted, for the reception of official and non-official visitors visiting him on business, or

(2) when it is satisfied that the capital cost, as determined under the above rules, would be greatly in excess of the proper value of the accommodation provided;

(*vi*) in assessing the cost or value of the sanitary, water-supply and electric installations and fittings, a Local Government may, by rules, determine what are to be regarded as fittings for this purpose.

III. The standard rent of a residence shall be calculated as follows:—

(*a*) In the case of leased residences the standard rent shall be the sum paid to the lessor, *plus* an addition determined under rules which a Local Government may make, for meeting, during the period of lease, such charges for both ordinary and special maintenance and repairs and for capital expenditure on additions or alterations as may be a charge on Government and for the interest on such capital expenditure, as also for municipal and other taxes payable by Government.

(*b*) In the case of residences owned by Government, the standard rent shall be calculated on the capital cost of the residence, and shall be a percentage of such capital cost equal to such rate of interest as may from time to time be fixed by the Secretary of State in Council, *plus* an addition for municipal and other taxes payable by Government and for both ordinary and special maintenance and repairs, such addition being determined under rules which a Local Government may make.

(*c*) In both cases standard rent shall be expressed as standard for a calendar month and shall be equal to one-twelfth of the annual rent as calculated above, subject to the proviso that, in special localities or in respect of special classes of residence, a Local Government may fix a standard rent to cover a period greater than one month, but not greater than one year. Where a Local Government takes action under this proviso standard rent so fixed shall not be a larger proportion of the annual rent than the proportion which the period of occupation as prescribed under rule 45 above bears to one year.

NOTE 1.—For the purpose of sub-clauses (*a*) and (*b*) above, the addition for both ordinary and special maintenance and repairs shall not include anything for the establishment and tools and plant charges, except to the extent allowed under proviso (*iv*) to clause II.

NOTE 2.—A Local Government may by rule permit minor additions and alterations, the cost of which does not exceed a prescribed percentage of the capital cost of the residence, to be made during such period as the rule may determine, without the rent of the residence being increased.

IV. When Government supplies a Government servant with a residence leased or owned by Government, the following conditions shall be observed:—

(*a*) The scale of accommodation supplied shall not, except at the officer's own request, exceed that which is appropriate to the status of the occupant.

(*b*) Unless in any case it be otherwise expressly provided in these rules, he shall pay rent for the residence, and such rent shall be the standard rent, as defined in clause III above or 10 per cent. of his emoluments, whichever is less.

(*c*) Nothing contained in clause (*b*) above shall operate to prevent a local Government from—

(*i*) grouping, after the standard rents have been calculated under the provisions of clause III above, a number of residences, whether in a particular area, or of a particular class or classes for the purpose of assessment of rent subject to the following conditions being fulfilled:—

(1) that the basis of assessment is uniform, and

(2) that the amount taken from any Government servant shall not exceed 10 per cent. of his emoluments;

(*ii*) taking a rent in excess of 10 per cent of his emoluments from a Government servant—

(1) who is not under its own administrative control, or

(2) who is not required or permitted to reside on duty at the station at which the residence is supplied to him, or

(3) who, at his own request, is supplied with accommodation which exceeds that which is appropriate to the status of the post held by him, or

(4) who is in receipt of a compensatory allowance granted on account of dearness of living.

V. In special circumstances, for reasons which should be recorded, a Local Government—

(*a*) may, by general or special order, grant rent-free accommodation to any Government servant or class of Government servants, or

(*b*) may, by special order, waive or reduce the amount of rent to be recovered from any Government servant

VI. If a residence is supplied with one or more of the following or similar services, furniture, installations (including fittings) for water or electricity supply or for sanitary purposes, tennis court, or garden maintained at the cost of Government, rent shall be charged for these in addition to the rent payable under clause IV. The tenant will also be required to pay meter hire and the cost of the water, electric energy, etc., consumed. A local Government may make rules prescribing how the additional rents and charges shall be determined, and such rules may also authorise the remission or reduction of the additional rent or charge in special circumstances for reasons which should be recorded.

VII. Nothing contained in this rule shall so operate as to require payment of rent, for the occupation of residences supplied by Government, by those servants of the Crown in India who have been exempted from such payment by order of the Secretary of State in Council, or to affect the amount of rent or charges payable by those servants of the Crown in India, in whose case the amount so payable is prescribed by the Secretary of State in Council.

DEPART[illegible]T OF AGRICULTURE, BENGAL.

Monthly Weathe[illegible]rt of Bengal for October 1928.

I. **Character of the se**[illegible]**ing** the month under review the rainfall was decidedly above the averag[illegible]in North and East Bengal. The usual rainfall statement is appended.

II. **Progress of agricu**[illegible]**s.**—Ploughing of fields for early spring crops and their sowings cont[illegible]bly. Harvesting of autumn crops were nearly finished.

III. **State of standing crops.**—Good rainfall during the month materially helped the development of transplanted winter paddy and the outturn in the affected districts remarkably improved. A normal outturn is expected for the province as a whole.

IV. **Prospects and probable outturn.**—The prospects of winter paddy were generally very satisfactory. The outturn of the sugarcane crop is expected to be 79 per cent. of the normal.

V. **Damage to standing crops.**—No damage except that by insect-pests in places of Nadia is reported.

VI. **Condition of agricultural stock.**—The condition of livestock was generally fair. Sporadic cases of cattle-disease were, however, reported from seven districts.

VII. **Failure of pasturage and fodder.**—The supply of fodder was generally sufficient except in parts of Murshidabad, Birbhum and Dinajpur where some shortage was reported.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the price of common rice of the cheapest quality rose in seven districts, fell in six and remained stationary in the rest of the province. It ranged from 8 seers per rupee at Burdwan to 5 seers per rupee at Rangpur and Faridpur.

IX. **Condition of agricultural population.**—The condition of the agricultural population was fair, on the whole, except in parts of Birbhum and Bankura where distress continued to prevail owing to a partial failure of the last winter rice crop. Test relief works continued to help the people of these districts. During the early part of the month test works have again been opened in parts of Murshidabad.

CALCUTTA THE [illegible] [illegible]MBER 1928.

RESOLUTION [illegible]. 5531.

Minister-in-charge: The Hon'ble Raja Bhupendra Narayan Sinha Bahadur, of Nashipur.

READ—

The Annual Report of the Department of Agriculture for 1927-28.

Administration.—Mr. R. S. Finlow, Director of Agriculture, Mr. K. McLean, Assistant Director of Agriculture Dr. G. P. Hector, Economic Botanist, Mr. D. Dutta, who occupied the post of Second Economic Botanist, and Mr. F. J. Gossip, Live Stock Expert, held charge of their respective offices throughout the year. Mr. M. Carbery, Agricultural Chemist, was on leave for 6 months during the year and Babu Gosto Behari Pal, Assistant Agricultural Chemist, performed his duties in his absence.

The Western Circle was in charge of Mr. J. N. Sarkar, officiating Deputy Director of Agriculture, and the Northern Circle was in charge of Mr. A. R. Malik, a temporary officer, throughout the year. In the Eastern Circle Mr. F. Smith, Deputy Director of Agriculture, was on leave for 5 months and his duties were carried out in his absence by Rai Sahib J. K. Biswas.

The post of Headmaster, Dacca Secondary Agricultural School, which has now been raised to the status of a provincial service post, was held by Babu Raj Nath Roy. This change of status was made in view of extra responsibilities involved in the training of teachers from high English and middle English schools which is now undertaken there in connection with the introduction of teaching on agricultural subjects in such schools.

The Board of the Department of Agriculture and the Bengal Silk and the Bengal Cotton Committees met only once each during the year. These are bodies to which Government attaches considerable importance and it is desirable that more frequent and regular meetings should be held.

Since the close of the year under review, the Report of the Royal Commission on Agriculture has been received, and is under careful consideration. A Conference of provincial representatives was called by the Government of India to consider the Commission's proposal and was held at Simla on 1st October 1928. Representatives of this province participated.

2. **Agricultural education.**—The expensive scheme for an Agricultural Institute is still far off realisation owing to want of funds. The Royal Agricultural Commission have recommended such a scheme and have also given their decision as to what they consider to be a suitable standard of qualification for entrance to the Institute, viz., the I.Sc.

As in the previous year, the Secondary Agricultural School at Dacca was far from full. There were only 12 students in the first year of whom 4 left during the session. The Minister in charge is glad to observe that 7 Demonstrators were put through a "refresher" course of one year with beneficial results. The training of teachers in connection with the scheme referred to in paragraph 1 began at this school towards the close of the year under report. It is intended to admit 15 such teachers each year and the course will last for two years. It is obvious that some years must elapse before any conclusion can be drawn as to the success or otherwise of this scheme, for the teachers first have to be taught and then the effects of their teaching over a period of years will have to be watched. It is to be observed that the Royal Agricultural Commission recommend this which is known as the "Punjab" system of education, i.e., the ordinary curriculum combined

with arrangements t[illegible]gricultural bias, in preference to the purely vocational sy[illegible]ni in Bombay has given its name.

It is gratifying[illegible]cess continues to attend the primary schools which ha[illegible]at Amriti, Piasbari and Kumarpur in connection with [illegible]nurseries.

The results of [illegible]e the sons of cultivators to come to the department[illegible]on continue to be disappointingly meagre. Yet it is [illegible] real progress in modern methods can be attained unle[illegible] are willing to work in a practical way, i.e., with their o[illegible]On the other hand, those engaged in agriculture showed grea[illegible] learn new methods. There was a marked increase in the [illegible]those who came forward for such instruction at all schools [illegible]Berhampore and Kumarpur. The numbers thus under train[illegible]iasbari increased from 26 to 115 and at Amriti from 32 to 62.

3. **Research and experiment.**—Work progressed on much the same lines as in the previous year both at the Central Research Station at Dacca and at the different district farms where attention is devoted to local problems, while the research students of Dacca University undertook the investigatio[illegible]certain problems which were referred to them.

Dr. G. P. H[illegible] admirable work on rice continues, and he has evolved some [illegible]mising strains by crossing early and late transplanted rices, on[illegible] particular being mentioned which, ripening on 6th November, yielded 39 maunds to the acre. The Director is able to state that the work of popularising the departmental paddies seems to be making really satisfactory progress.

Attention continues to be given to fodder crops. Mr. Finlow states that there is a type of *bajra* under investigation which promises to oust even Japanese millet.

The preparation and use of artificial farm-yard manure was extended to nearly all the farms. Dacca Central Farm made 6,000 maunds of artificial farm-yard manure, as against 3,000 maunds last year, and most farms increased their output.

As regards sugarcane, the popularity of C.O. 213 increased and out of 750,000 cuttings distributed 650,000 were of that variety.

The Director has some extremely interesting observations to make on the subject of irrigation. He points out that the problems is not so much one of distributing water (as in the Punjab) over tracts which are otherwise waterless, but of supplying a comparatively small quantity at the right moment. An irrigation organisation on a comparatively small scale, such as a pumping apparatus to draw water from a *bil* or river, or a tube-well, could supply sufficient moisture to rectify the failure of the monsoon to supply its moisture at a particular season. The extra inch or two at the end of the monsoon which means the difference between a good and an indifferent paddy crop could thus be supplied. Similarly, comparatively inexpensive plant could be utilised to furnish water for the fodder crops which are being recognised more and more to be a crucial factor in the improvement of cattle and which could thus be grown at a time when the land is otherwise lying idle.

It is evident that this matter of irrigation is exciting increased attention and the department is evidently alive to the possibilities of the situation.

The Director's remarks about the *Haor* tract in Mymensingh are interesting. Water-hyacinth has rendered the cultivation of deep-water paddy unremunerative. But the cultivators have come forward with the suggestion that *boro* paddy, a remunerative and high yielding crop, could be grown in the dry season by means of a system of pumping from the rivers. The Director of Agriculture has made arrangements for carrying out an experiment next cold weather, the department applying the pump and the channels being dug by the tenants and the proprietor. The results of this experiment will be important, both in respect of the particular problem to solve which they are being initiated, and also in respect of the information they are expected to furnish as regards this class of irrigation in general.

4. **Agricultural stations and farms.**—Dinajpur, Malda and Mainaguri have come practically into full working order. At Rangamati reclamation is not yet completed. Work is in progress on the buildings and on reclamation at the Krishnagar Farm. There are great possibilities at the latter place where the whole of the great area of the "Company Began" has been handed over to the Agriculture Department.

A striking proof of the eagerness of the local inhabitants to learn improved methods of agriculture is to be found in the collection locally of Rs. 2,200 for the establishment of a small demonstration farm at

Rajbari in Faridpur district, which [illegible] largely due to the energy of Rai A. K. Mukherjee Bahadur, t[illegible] S[illegible]ional Officer.

The Kalimpong Farm will, with [illegible] current year, come more definitely under the control of th[illegible] though the Homes and their founder will still continue [illegible] connected with it. The Governor, acting with his Mini[illegible]e this opportunity of acknowledging the excellent w[illegible] with the influence of Dr. Graham behind it, has don[illegible]reading better seeds, especially maize, wheat and must[illegible] methods of farming in the Darjeeling district.

An interesting experiment i[illegible] in Faridpur which was initiated by Mr. Burrows, lately [illegible] of that district, aided by the District Agricultural Officer, where [illegible]*dralok* lads after training on the Faridpur Farm are to be settled [illegible] of khas-mahal land. The scheme has not yet been in operation [illegible]nough to come to any conclusion as to its possibilities.

The Hon'ble Minister desires again to refer with satisfaction to the excellent pioneer work that continues to be carried out on the farms of Rai Kumud Nath Mullick Bahadur at Ranaghat, Kumar Sarat Kumar Ray at Dayarampur, and many others.

5. *Seed distribution.*—Two thousand and sixty-nine maunds of guaranteed departmental jute seed, the whole amount raised, were sold as against 3,708 in the previous year. As before, the Indian Jute Mills Association guaranteed the loss, if any, which might fall on the Government selling agent through not being able to sell the whole of the amount raised, but they were not called upon to fulfil their guarantee. The reason for the smaller quantity produced was that in the previous year the selling agent was left with some quantity on his hands. The producers, therefore, were asked to produce less, and this reduced amount became still less owing to an unfavourable season.

The Director refers with satisfaction to the success of the experiment, which was made possible by the generosity of the London Jute Association, of distributing free packets of departmental jute seed. The Association made a payment of £1,500 which was spent partly in 1927 and partly in the succeeding year. As Mr. Finlow points out, the use of these higher yielding strains means that 25 per cent. more of the land, which was formerly under local varieties, is set free for other food or fodder crops.

Two hundred paddy-seed farms were in operation during the year. There were 270 in the previous year, and it has, as was anticipated last year, been found necessary to curtail the number to ensure more satisfactory working. Orders for 5,265 maunds of seed paddy were received, of which nearly 5,000 maunds were supplied, 74 per cent. of this amount being from private growers. Co-operative Societies play a part in this work of seed distribution which, if extended, will be invaluable. Thus the Naogaon Co-operative Bank purchased 160 maunds of *aus* seed and 700 maunds of *indrasail and dudshar* to distribute among their members. The high yields obtained from departmental *aus* paddy which Dr. Hector reports, ranging from 37½ to 45 maunds per acre or increases of from 3½ to 9 maunds over the local varieties, make the interest thus displayed not unnatural.

6. *Cattle breeding.*—The scheme drawn up by Mr. Gossip to which reference was made in last year's review is in process of being put into operation. It has two branches—(*i*) a premium bull system and (*ii*) an arrangement by which Co-operative Societies either of the ordinary type or formed specially for the purpose will purchase approved bulls and maintain them under supervision for breeding purposes. The district selected for the first working of the scheme is Malda where certain local people have shown great interest in its details. The popularity of good bulls is illustrated by the fact that more than thrice as many cows were covered by departmental bulls this year as compared with the previous year, viz., 769 against 234. The supply of departmental bulls in Bengal is far short of the demand, but provision has been made in the budget in the current year for increasing the herd at Dacca.

A most important event is the strides that have been made in the making of pit-silage since Mr. Gossip has taken charge. He has proved that from October to June as good pit-silage can be made in Bengal as anywhere else. This means that succulent feed can be made available during the dry months to the great advantage of the live-stock. It is gratifying to learn that in consequence of the manufacture of silage, Rangpur Farm instead of having to purchase fodder has had surplus paddy straw for sale. As the Agricultural Commission point out in Chapter VII of their report, the cultivation and storage of fodder crops and not the oft-advocated provision of grazing grounds, is the

key to increased fod[illegible] suppl[illegible] that the agriculturists know it is proved by the Directo[illegible] statem[illegible] that the cultivation of these crops is visibly on the incr[illegible]

A Catttle Comm[illegible] rmed during the year to co-ordinate the work of the differen[illegible] ts of Government which are concerned in, this matter.

A scheme has b[illegible] rat[illegible] ly sanctioned by Government for setting up a properly [illegible] ry at Dacca Farm with modern buildings. When fun[illegible] able for this, the herd, now housed in old and unsuitable qua[illegible] will be moved there and it will be possible to instruct both Gove[illegible] ent's own officers and outside pupils as well in the correct methods o[illegible] tle management and dairying. The increasing interest in the probl[illegible] f milk supply in large towns makes the implementing of this scheme a matter of prime importance.

7. **Agricultural associations.**—As in previous years, the quality of work accomplished by the different associations varied to a marked degree. Government have under consideration proposals for a re-organisation of these associations so as to arouse a keener interest among the members and to ensure that the grants given to the associations are spent to better advantage.

8. **Propaganda a[illegible] exhibitions.**—It is regrettable that want of funds has preven[illegible] the appointment of the 7 District Agricultural Officers whose [illegible] ertainment was administratively approved by Government two years ago. The Hon'ble Minister is satisfied that the department is fully alive to the need of active propaganda. As the Royal Commission has observed in its report, the best propaganda is to be found in the work of the demonstrator growing his improved seed at the door of cultivator. To this might be added the valuable results to be obtained from the ocular demonstration of plots grown under the share system by cultivators themselves as at Kishoreganj, Jamalpur and elsewhere, where one of the conditions on which they hold the land is that they shall grow departmental seeds. In connection with propaganda the Nadia District Board deserves special mention. It organised a touring exhibition containing Public Health, Agriculture and Veterinary Sections which was sent round most parts of the district in December 1927—January 1928. This venture cost the District Board about Rs. 2,200 which includes the price of a cinema machine. Such enterprise is an example of what can be done and its imitation is commended to other local bodies as well worthy of imitation.

Much may be done through Union Boards and the Governor, acting with his Minister, will watch with interest the progress of the experiments in this direction in Faridpur which were initiated by Mr. Burrows when Collector of that district.

The Co-operative Department is contributing appreciably to the work of popularising improved seeds and the storage facilities which co-operative societies are in a position to provide are a valuable adjunct to the work. The Director of Agriculture also visualises the co-operative purchase of manures and implements, as also the joint financing of irrigation work, as a likely feature of the future.

The training of co-operative officers in agricultural matters by short courses at Dacca Farm is an excellent move which has the hearty approval of Government, and as the Director of Agriculture observes, the corollary to this, i.e., the training of Agricultural Officers in co-operative principles, can be productive of nothing but good.

Exhibitions are a most valuable vehicle for propaganda work, and full use was made of them. Lectures and demonstrations were given by officers of the department, and the magic lanterns, for which funds have been provided in the current year, will form a further means of bringing the work of the department in an attractive form to the notice of the public. The Eastern Bengal Railway exhibition train was again run, and was as in the previous year a great success. The cinema films which are under preparation will it may confidently be expected, be invaluable.

9. **Sericulture.**—The nature of the season, characterised as it was by an unusually prolonged drought together with frost in January, had an unfavourable effect on the mulberry crop, and consequently on the prices obtainable for seed cocoons. Though the output therefore of the 12 Government nurseries increased from 21,083 to 22,512 *kahans*, the prices realised were only Rs. 56,096 as against Rs. 62,192 in the previous year.

Attention continues to be given to the best methods of increasing by scientific manuring the output of leaf on the nurseries, and with success; and it is hoped that a stage may be reached when the purchase of

outside leaf may become unnecessary. The yield of leaf was increased by 5,000 maunds or over 60 per cent [illegible] this year. Further reports about the success of the use of tree-mulberry in [illegible] e of the bush variety which has hitherto been popular will [illegible] with interest. The advantage of the tree variety appears t[illegible] eater powers of resistance to drought and its capacity for p[illegible] irrespective of the

The outturn of seed cocoons by [illegible] rs fell during the year under report from 19,000 to 15,000 ka[illegible] tion which is explained by the very unfavourable season[illegible] tions. A sensible step was sanctioned by Government during t[illegible] year in the closing of the sericultural school at Rajshahi and [illegible] starting of one at Piasbari in Malda district. Local interest as [illegible] denced by the number of local students, had long been at low ebb in the former place and conditions were far less favoura[illegible] to proper instruction than they are in Malda. Disappointing as this [illegible] ision must have been to those who, like Professor H. D. Mukerji, [illegible] lly did take an interest in the work, the Minister feels that it is genera[illegible] recognised as a right one.

Demonstration work in the vill[illegible] was continued, especially in the district of Malda and there are unm[illegible] kable signs that the work is bearing fruit in the shape of improved m[illegible] ds of rearing and the use of better houses and appliances

10. The Government of Bengal (Ministry of [illegible] culture) have read with pleasure the list of names submitted by the [illegible] tor of Government officers and private persons who have rendered va[illegible] assistance in the cause of agriculture during the past year. It would [illegible] vidious to particularise.

The Director himself and his staff deserve congratulation on completion of another year of valuable work, and for the very prompt submission of the annual report.

In conclusion, the Minister feels bound to state that he has to discharge the duty of reviewing the administration of a year in the policy or supervision of which he had no hand, and so naturally he had to proceed on records as he found them. The difficulties of his delicate task have been further enhanced by the fact that he had to undertake this duty even before he had a reasonable time to shape his own policy.

CALCUTTA, THE 26TH NOVEMBER 1928.

RESOLUTION—No. 13160A.

The Governor in Council has heard with deep regret of the death in England of Mr. W. A. Marr, C.I.E., I.C.S., on the 18th November 1928. During his service of 32 years, Mr. Marr was in charge of some of the most important districts in Bengal, and after acting as a Commissioner on three occasions, he was confirmed in that grade in July 1925. He had recently been selected for the important appointment of Member of the Board of Revenue. His work was marked by exceptional ability and devotion to duty, and by his intimate knowledge of the problems of rural Bengal, in which he preferred to serve. His Excellency in Council desires to record his profound regret at the loss of an officer whose advice he highly valued, and to convey his sincere condolences to the relatives of Mr. Marr.

AGREEMENT.

Memorandum of agreement made this 16th day of November 1928, between the Taki Central Co-operative Bank, Limited, a registered Society within the meaning of the Co-operative Societies Act, 1912, and having its registered office at Basirhat in the district of 24-Parganas (hereinafter called the Society) of the one part and the Secretary of State for India in Council (hereinafter called the Secretary of State) of the other part.

Whereas for the purpose of the construction of an office building and other necessary out-houses for the Taki Central Co-operative Bank, Ltd., the Society has applied to the Government of Bengal for the acquisition under the provisions of the Land Acquisition Act, I of 1894, of the piece of land containing 0·159 of an acre or thereabout situate in the village of Saipala in the district of 24-Parganas and more particularly described in the schedule hereto and delineated in the plan* herounto annexed.

And whereas the said Government of Bengal, being satisfied by an enquiry held under section 40 of the said Act that the proposed acquisition is needed for the aforesaid purpose and that the said work is likely to prove useful to the public, has consented to acquire on behalf of the Society the piece of land hereinbefore described.

And whereas the said Government of Bengal has required the Society under the provisions of section 41 of the abovementioned Act to enter into the agreement with the Secretary of State hereinafter contained. Now this Indenture witnesseth that it is hereby agreed and declared as follows:—

PART VI.

Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

Legislative Department.

The following Bill was introduced in the Legislative Assembly on the 4th September 1928:

L. A. BILL NO. 27 OF 1928.

A Bill further to amend the Indian Succession Act, 1925, for a certain purpose.

WHEREAS it is expedient further to amend the Indian Succession Act, 1925, for the purpose hereinafter appearing; It is hereby enacted as follows:— XXXIX of 1925.

Short title.

1. This Act may be called the Indian Succession (Amendment) Act, 192 .

Amendment of section 213, Act XXXIX of 1925.

2. In sub-section (*2*) of section 213 of the Indian Succession Act, 1925, for the word and figures " section 57 " the words, figures and brackets " sub-section (*1*) of section 57 " shall be substituted. XXXIX of 1925.

STATEMENT OF OBJECTS AND REASONS.

The Indian Succession (Amendment) Act, 1926 (XXXVII of 1926) was passed with a view to give effect to the recommendation of the Civil Justice Committee that all wills made by Hindus, Buddhists, Sikhs and Jains, even in areas outside those where section 57 of Act XXXIX of 1925 is in force, should be required to be reduced to writing, signed and attested. But it was not intended that the requirement of probate or letters of administration should apply to such wills. The new provision was inserted as clause (*2*) of section 57. No corresponding change was, however, made in section 213 exempting the wills specified in clause (*2*) of section 57 from the requirement of probate or letters of administration. The present Bill gives effect to the original intention and excludes wills falling under clause (*2*) of section 57 from the operation of clause (*1*) of section 213 by amendment of sub-section (*2*) of the latter section.

The following Bill was introduced in the Legislative Assembly on the 4th September 1928:—

L. A. BILL No. 29 OF 1928.

A Bill further to amend the Indian Penal Code for a certain purpose.

WHEREAS it is expedient further to amend the Indian Penal Code for the purpose hereinafter appearing; It is hereby enacted as follows:— XLV of 1860.

Short title. **1.** This Act may be called the Indian Penal Code (Amendment) Bill, 1928.

Amendment of section 505, Act XLV of 1860. **2.** In section 505 of the Indian Penal Code, after clause (*c*) the following clause shall be inserted, namely:— XLV of 1860.

" or

(*d*) with intent to promote, or which is likely to promote, unfriendly relations between His Majesty's Government and the Government of any Foreign State."

STATEMENT OF OBJECTS AND REASONS.

This Bill is designed to fill a dangerous gap in the Indian law, the existence of which has recently been revealed. There is no provision in the Indian Penal Code which penalises statements made with the intention of, or which are likely to have the effect of, interfering with the peaceful relations between India and a foreign country. The Bill adds a clause to section 505 of the Indian Penal Code, under which prosecution cannot be undertaken without sanction under section 196 of the Code of Criminal Procedure, 1898. The benefit of the existing exception under section 505 will of course be available to persons charged under the clause added by by this Bill.

Minister-in-charge: The Hon'ble Raja Bhupendra Narayan Sinha Bahadur, of Nashipur.

No. 19R.—The 27th November 1928.—Whereas an application has been made by Messrs. Gillanders Arbuthnot and Company of Calcutta for sanction to the construction of an aerial ropeway for the carriage of goods from Riyang to Kalimpong, in the Darjeeling district; Now therefore the Government of Bengal (Ministry of Public Works), after due consideration of the details supplied in accordance with section 5 of the Bengal Aerial Ropeways Act, 1923, is pleased to publish under section 6 the following draft of an order authorising the construction by Messrs. Gillanders Arbuthnot and Company of the said ropeway.

II. Any objection or suggestion which any person may desire to make with respect to the proposed order, received not later than the 1st February 1929, will be duly considered.

R. N. REID,
Secretary to the Government of Bengal.

Draft Order.

Preliminary.

1. This order may be called the Riyang-Kalimpong Ropeway Order.

2. In this order, unless there is anything repugnant in the subject or context, the expression "the Act" means the Bengal Aerial Ropeways Act, 1923.

3. The ropeway authorised by this order for the carriage of goods from Riyang to Kalimpong, in the district of Darjeeling, shall be constructed, maintained and worked subject to the provisions of the Act, or the rules from time to time in force under the Act and of this order and of any other order or orders, rules or regulations from time to time made or prescribed in connection with the working of the Riyang-Kalimpong Ropeway.

4. No powers or rights shall be deemed to have been conferred on the promoters or to have been relinquished by Government except as in this order expressly provided.

5. Messrs. Gillanders Arbuthnot and Company shall be the promoters for the purposes of this order, and are in this order referred to as the promoters.

Construction of Ropeway.

6. The promoters shall raise the capital required for the construction of the ropeway within a period of twelve months from the date of the confirmation of this order authorising the construction, and the construction shall commence within two years from the date of the confirmation of the order.

7. Within a period of eighteen months from the date of the commencement of the construction of the ropeway the promoters shall, in accordance with the provisions specified in this order, and also in accordance with plans and sections to be deposited by the promoters and to be approved by the Government of Bengal, construct and maintain the ropeway hereinafter described with all proper establishments, trestles, ropes, stations, offices, carriers and conveniences connected with the ropeway or required for the purpose thereof.

8. In the event of the said promoters failing to raise the capital required or to commence construction and to complete and equip the ropeway as provided in clauses 6 and 7 within the time specified, or within such further period as may be allowed for the purpose by the Government of Bengal, then and in any such case the said Government shall be at liberty to revoke this order.

9. In the event of this order being revoked by reason of the promoters failing to complete and equip and open for traffic the said ropeway within a period of three years and six months from the date of this order, or within such further period as may be allowed for the purpose by the Government of Bengal, the said Government shall have the option of taking over the ropeway and carriers or parts thereof at a reasonable valuation to be determined by the said Government.

If, however, the Government of Bengal do not desire to exercise the option of taking over the ropeway and the carriers or parts thereof as herein provided, then and in such case the ropeway may be dealt with under the provisions of the Act relating to the discontinuance of an aerial ropeway which has been proved to the satisfaction of the Government.

10. The ropeway authorised by this order is of the mono-cable type with detachable carriers within the district of Darjeeling, starting from Riyang to Kalimpong, with a total length of 7½ miles approximately and with a carrying capacity of 12½ tons per hour both ways.

11. The promoters may use free of cost for the construction of the ropeway an area of about 15½ acres of Government *khas* land to be described in a Schedule to be published hereafter, but such portions of the said area as lie in forest land shall remain reserve forest.

12. In the event of the profits of the company on the working of the ropeway exceeding 5 per cent. on the capital expended, the Government of Bengal reserve to themselves the right to require payment of rent for the land actually in occupation of the company at such rate as may be mutually agreed upon between the said Government and the promoters.

13. Such additional land as may be required by the promoters and deemed by the Government of Bengal to be necessary for the purposes of the ropeway shall be either acquired by the Government of Bengal on behalf of the promoters under the Land Acquisition Act, 1894, and the cost of acquisition shall be met by the promoters, or sold or leased by the said Government, on such terms as may be determined by them, to the promoters. The promoters shall not, without the consent of the Government of Bengal, sell or otherwise dispose of any land of which they may have been put in possession by the said Government for the purposes of the ropeway when such land is no longer required for such purpose.

14. The ropeway shall be constructed in accordance with drawings to be approved by the Government of Bengal, and the factor of safety in all cases except in anchorages or foundations shall not be less than 4. For foundation anchorages it shall be sufficient if the moment of resistance of the foundation exceeds the overturning moments by 50 per cent. The factor of safety of 4 shall be obtained in the case of the rope by dividing the actual breaking stress of the rope by the maximum direct tension to which it will be subjected. Station gears, trestles and sheaves shall be so designed and placed that lubrication can be performed safely whilst the ropeway is in motion, and the speed of the rope shall not exceed 180 yards per minute.

15. The minimum clearance of the ropeway from the ground except within station limits shall be 12 feet, and if in any place this clearance is less it will be open to the Government of Bengal to call upon the promoters to provide at the promoters' expense within 3 calendar months fencing on both sides of the ropeway for such length where the clearance is less than 12 feet, and the promoters shall be bound to comply with all such requisitions.

16. The promoters shall, at their own cost, construct and maintain all such stations, trestles, sidings and all other works in addition to those specified in or authorised by this order and shall also employ and maintain all such establishments, in addition to those specified in or authorised by this order as the Government of Bengal may from time to time consider to be expedient for the safe and efficient working of the ropeway or for the convenience and safety of the public. All such additional works shall be completed to the satisfaction of the said Government, and all the provisions of this order shall so far as applicable apply to such works.

Motive power, speed and signals.

17. The carriers used on the ropeway may be moved by steam power, and all driving stations shall be fitted with hand or automatic breaks to keep the speed of the rope within the maximum limit of 180 yards per minute.

18. For the purpose of giving signals the promoters shall instal telephones at all terminal and intermediate stations which will enable the ropeway to be stopped at any instant.

Maintenance and working of Ropeway.

19. The promoters shall at all times maintain and keep in good condition and repair to the satisfaction of the Government of Bengal or of any officer duly authorised in this behalf by the said Government, the entire ropeway, carriers and appliances and shall work the same in such manner as will, in the opinion of the said Government or of such officer as may be authorised in this behalf by the said Government, avoid all risks of danger or annoyance to the public.

20. The undertaking and all works stock, appliances and accounts appertaining thereto shall at all times be open to inspection and examination by any officer or officers whom the Government of Bengal may authorise for that purpose, and the promoters shall afford all reasonable facilities for inspection or examination to such officer or officers.

21. If, as a result of inspection of the ropeway or any portion thereof, or of any carriers used thereon, the officer making the inspection under clause 20 reports to the Government of Bengal that the ropeway or any part thereof cannot be used without danger to the public, or is no longer in a fit state for the carriage of any specific class of traffic, the said Government may direct that the ropeway or a portion thereof shall be closed to all traffic or to any specified class of traffic.

22. When the ropeway or any portion of it has been closed under clause 21, it shall not be reopened for the public conveyance of goods unless and until it has been inspected again by the officer referred to in clause 20 or any other officer authorised in this behalf, and its opening is sanctioned by the Government of Bengal as a result of such inspection.

23. When the Government of Bengal have under clause 21 prohibited the use of any carrier, the said carrier shall not be used again without further sanction by the said Government.

24. The promoters shall not, without the consent of the Forest officer in charge of the district, cut down or lop any tree growing along or by the side of the ropeway, provided that in case of emergency the promoters may remove or lop branches or any portion of a tree which stands in such a manner as to be a source of danger or impediment to the ropeway traffic, and in any such case they shall without loss of time report their action for confirmation by the Forest officer.

Traffic and traffic working.

25. The ropeway may be used for the purpose of conveying goods traffic only. All goods which will not, in the opinion of the ropeway management and of the Government of Bengal, interfere with the proper and safe running of the ropeway or the safety of the staff or public shall be carried, but the management shall have the right to refuse to carry such goods as are dangerous or obnoxious, or beyond the capacity of the ropeway. At the outset the maximum rate for the carriage of goods is fixed at six annas per maund, but the Government of Bengal reserve the right to increase or lower this rate.

Miscellaneous.

26. The Government of Bengal, or a local authority with the previous sanction of the said Government, shall, by giving to the promoters previous notice in writing of not less than two years, have the option to purchase the ropeway referred to in section 24 of the Act, either on the 31st day of March 1946, or on the 31st day of March in the last year of any subsequent period of ten years on payment of the value of all lands, buildings, works, materials, plant and apparatus of the promoters, suitable to, and used by them for purposes of the undertaking *plus* 20 per cent. of the value.

27. The promoters are authorised to transfer their entire rights in this undertaking to any other Company to be floated for the purpose of constructing and working the ropeway, and the consideration for such transfer shall be limited to the extent of the actual money spent by the promoters on this undertaking and in obtaining this order.

28. In case it be hereafter found that any portion of the alignment adopted by the promoters for the ropeway interferes with the location of any new lines of railway or roadway or the extension of any existing line of railway or roadway, the alignment occupied by the ropeway shall be forthwith, at the request of the Government of Bengal, abandoned in favour of the railway or the roadway, and the ropeway shall be diverted or altered in such way and in such manner as shall appear to the Inspector or other officer duly appointed in this behalf by the said Government to be fair and proper, provided that the actual cost incurred in this connection shall be borne by the authorities of the said railway or roadway.

29. In the event of any work required by the Act or by this order to be done by the promoters not being done by them, the Government of Bengal may cause a notice to be served on the promoters requiring them, within a period to be prescribed in the said notice, to execute the said work, and if within the period so prescribed such requisition is not complied with, the said Government may cause such work to be done and the cost thereof to be recovered from the promoters. The certificate of the Inspector or other officer appointed by the Government of Bengal in this behalf shall be conclusive evidence that all expenses referred to in such certificate have been incurred in carrying out such work and the promoters shall not be at liberty to dispute the same.

30. The promoters shall adopt and apply all such improvements in the ropeway and in the carriers and appliances thereon as the Government of Bengal may from time to time consider necessary or desirable for the safety or convenience of the public.

31. The promoters shall provide without unreasonable delay such statistics relating to the ropeway or to the traffic thereon as may time to time be required by the Government of Bengal.

32. It is hereby expressly provided that no concession granted under this order confers on the promoters any exclusive right as carriers over any part of the tract traversed by the ropeway.

Arbitrations.

33. (1) If any dispute, question or controversy shall at any time arise either between the Government of Bengal and the promoters, or the local authorities and the promoters, touching this order, or any clause or thing herein contained, or the construction hereof or any matter connected with this order, or the operation of the same, or the rights, duties, or liabilities of any of the parties in relation to the premises, then, and in every such case the matter in difference, unless special provision shall have been made in this order for the settlement of the matter so in difference, shall be referred to two arbitrators or to an umpire to be appointed by them, pursuant to and so as with regard to the mode and consequences of the reference, and in other respects to conform to the provisions in that behalf contained in the Code of Civil Procedure, 1908, so far as the same may be applicable.

(2) Upon every such reference the arbitrators and umpire shall respectively have power in accordance with the provisions of the Indian Arbitration Act, 1899, to examine witnesses upon oath or affirmation, and either to fix, settle, and determine the amount of cost of the reference and award respectively or incidental thereto to be paid by both the parties making the reference or by either party, or to direct the same to be taxed either as between Solicitor and client or otherwise, and to direct and award where and by and to whom such costs shall be paid.

ENGLISH SYLLABUSES FOR SECONDARY SCHOOLS OF BENGAL.

Syllabus A.

CLASS III.

Speech Training, Writing and Reading.—Systematic training in the sounds of spoken English in connection with the pronunciation of easy words. In the later part of the course, the class should be able to carry on very simple conversation about familiar objects and actions.

The writing of English letters; written and printed small letters first, and then written and printed capital letters. As soon as the letters are known, words and sentences may be practised. Transcription from the black-board and from the reader are essential.

Reading should not be begun until some facility in speech and a fairly large vocabulary of common words have been acquired. A primer should be introduced during the second half of the year. The pupils will then have done a certain amount of reading from the black-board, and if the sentences in the primer are about equal in point of difficulty to those used in the conversational lessons, the transition should be easy.

There should be a considerable amount of reading aloud both by the teacher and by the pupils. Special attention should be paid to pronunciation.

The pupils may be asked to form easy sentences containing words from the primer, and should answer in English questions based on the matter of the primer.

Grammar.—The teaching should be incidental and should include:—Names connected with objects; ways of naming one thing and more than one thing; this and that, these and those, here and there, etc.; words showing action; present time, past time, future time; the numbers 1—20.

CLASS IV.

Reading.—On similar lines to Class III. Much individual reading aloud is desirable in order to correct mis-pronunciation of words and to secure reasonable fluency. The essential quality to be secured here is not expressiveness but clear utterance.

Pupils should give briefly and in their own words the substance of passages which they have read.

There should be one reader for detailed study. One or more readers should be provided for more rapid reading. The teacher should also read aloud stories or extracts.

Easy sentences from the primer should be rendered into the vernacular. A pupil should not be asked to translate any sentence of which he has not thoroughly grasped the purport.

Poetry.—A number of very simple poems should be read aloud by the teacher and the pupils during the year.

Speech Training and Composition.—Easy conversations about familiar objects and actions, and topics of the reading lessons; stories told by the teacher and retold by the class; descriptions of pictures shown to the class. New words from the readers to be used in simple sentences. The pupils should be encouraged to ask questions so as to show in what direction their vocabulary needs supplementing.

Transcription from the black-board and from readers. Spelling of words in the readers.

Dictation of words and sentences previously learnt in the readers. The average length of a piece should be six lines.

Easy written composition based on the exercises. The subjects should be concrete and simple, *e.g.*, accounts of common sights and experiences, descriptions of pictures, invention and reproduction of stories.

The pupils should possess a fairly complete stock of ideas about a subject before beginning to compose.

Commas and full stops should be required.

Grammar.—Some Grammar has already been taught in connection with the mother tongue; in the English lessons, it should be reviewed.

When the pupils have acquired a reasonable command of ordinary language, they may be told the names of the different parts of speech and their functions in the sentence. They need this knowledge in order to express their own meaning correctly and to ascertain with accuracy the meaning of passages.

Some formal grammar is necessary, and should include:—Division of a sentence into two parts; subject and predicate. Nouns, verbs, pronouns, adjectives and adverbs (without sub-classification); and their uses in simple sentences. Simple forms of sentences. The joining together of simple sentences. The full stop and the comma.

Oral and written work on the above.

CLASS V.

Reading.—Individual reading aloud from a reader. Special attention should be given to correct pronunciation.

The pupils should use the words of the reader in forming simple sentences, and should be able to answer in English questions based on the matter of the reader. The answer may now be in the form of connected and continuous narrative.

Though the initial difficulties of mechanical reading should by now have been overcome, the teacher will still constantly read aloud to assist the class in improving their standard of reading.

There should be one reader for detailed study; and one or more supplementary readers should be provided. The teacher should also read aloud short stories or extracts.

Sentences from the readers, the purport of which has been thoroughly grasped, should be rendered into the vernacular.

Poetry.—The treatment in Class IV should be continued. The pupils should learn a minimum of forty lines of poetry by heart.

(The main story or leading idea of each poem should be understood by the pupils; it is not necessary for them to understand every word or phrase.)

Speech Training and Composition.—The method used in Class IV should be developed. Sufficient subject matter should be available from within the range of the pupils' experience, *e.g.*, scenes which they have seen, descriptions of persons whom they know or of whom they have read, topics from their reading lessons. In giving accounts of what they have seen, heard or learnt, the pupils should speak for a longer time than in the former class. The teacher should now do less talking and allow the pupils to do more.

Spelling of words in the readers and in connection with mistakes in the composition.

Eight lines of dictation from the readers at a time. Transcription from the black-board and from the readers.

Composition as in Class IV. Graduated stories read aloud by the teacher. Original composition should be introduced, *e.g.*, six sentences on the subject of an oral lesson. Words and phrases from the readers should be used in simple sentences.

Grammar.—The subject should be taught in connection with the reading lessons, and with oral and written composition; and should be based on the vernacular grammar wherever possible. It should include:—Revision of previous grammar in connection with more difficult sentences. Number and gender of nouns and pronouns. Adverbs, prepositions and conjunctions (without sub-classifications). Interjections. The definite and the indefinite articles. The conjugation of the three simple tenses. The verb "to have" and the verb "to be.".

Oral and written answers on the above.

CLASS VI.

Reading.—Development of previous work. To read with correct pronunciation from readers; to use the words of the readers in simple sentences; and to answer in English questions based on the matter of the reader.

Reading aloud should be continued, but some silent reading should be introduced. The pupils should now have mastered mechanical difficulties, and be able to recognise and pronounce words rightly. They should now sometimes read as grown up people read, that is, silently. The teacher should exercise general supervision over this reading.

In addition to the reader for detailed study, one or more supplementary readers should be provided.

Passages from the readers and simple stories, the purport of which the pupils have fully grasped, should be rendered into the vernacular. Translation of simple sentences from the mother tongue into English should now be begun.

Poetry.—The treatment in Class V should be continued. A minimum of sixty lines should be learnt by heart.

The poems learnt by heart in the lower classes may sometimes be asked for.

Speech Training and Composition. As before, plenty of conversation by the members of the class. More difficult sentences should now be used. Fuller connected accounts of what the pupils have seen, heard or learnt should be required. These accounts should more often be substituted for the method of question and answer.

The written composition should include the reproduction of simple stories, and practice in the use of easy idiomatic sentences. The exercises should be on subjects within the range of the experience of the class. About half of the composition should be based on the matter of the reading lessons. Instruction should also be given in elementary points of arrangement, construction and punctuation.

Letters of a simple kind; home topics should be largely dealt with.

Spelling of words in the readers and of composition mistakes.

Dictation of passages from the readers—about ten lines on each occasion.

Grammar.—The use of words is understood by the recognition of their relation to other words, and not by the investigation of themselves. Some formal grammar is necessary, but the function of the parts of speech should receive most attention. The work should include: Revision of previous work in grammar. Classification of nouns, pronouns, adjectives and adverbs. Cases of nouns and pronouns. The uses of relative, interrogative and demonstrative pronouns. Comparatives and superlatives. The nominative case after the verb. Participles and gerunds. Voices. The conjugation of the remaining tenses. Simple ideas of moods. Auxiliary verbs, *e.g.*, may, might, shall, will, should, would, must, can. The direct and the indirect objects. Analysis of simple sentences.

Exercises on the above chiefly in connection with errors found in the composition exercises.

CLASS VII.

Reading.—Reading aloud should be continued, but it should be less frequent. Silent reading, under the supervision of the teacher, should take its place. In addition to the reader for detailed study, one or more easy supplementary readers should be provided. Sentences should be formed and questions answered in English based on the vocabulary of the readers. The intelligent and expeditious use of a good dictionary should also be taught. More difficult passages from the readers and from compositions should be rendered into English. Translation from the mother tongue into English of easy passages should be prepared orally and then written.

Poetry.—On similar lines to Class VI. The teacher should still read aloud the longer poems. A minimum of eighty lines of poetry may be committed to memory in this class.

(The poems learnt by heart in the lower classes should sometimes be asked for.)

Spoken Language and Composition.—Development of previous work. Free conversation on the substance of the readers should be added. The practice of continuous oral narration should still be employed.

In the composition lessons, a beginning should be made of describing familiar scenes and objects; selections of these should be read out and criticised by the class. Subjects of topical interest, or obtainable from observation, or from books within the pupils' reach should be introduced. More difficult idiomatic sentences based on the matter of the readers should be required.

Short easy letters within the child's experience; directions borrowing and returning books or other articles necessitating replies, *e.g.*, invitations, refusals or acceptances; comparison of schools, towns, recreations.

Spelling of words in the readers and from composition errors. Dictation of passages of the standard of the prescribed readers.

Grammar.—General knowledge of the various parts of speech. Simple rules of syntax including the enlargement of subject and object; the extension of the predicate. clause analysis; compound and complex sentences; nouns, adjectival and adverbial clauses; and elementary instruction in direct and indirect speech.

CLASS VIII.

Reading.—As above, with more difficult readers. Reading aloud should be continued, but to a lesser extent than formerly. The teacher should occasionally read aloud passages of special literary merit.

Attention should now be paid to facility in silent reading; and for this purpose, supplementary readers should be used as unseen passages. One reader for detailed study should be selected, and at least one or more easy story books for silent reading should be provided. The aim should be to give children a liking for good books and the power of reading them intelligently and quickly.

Writing in the vernacular the substance of a lengthy passage of English read or heard. Translation of easy passages from the mother tongue into English from the vernacular reader prescribed for Class II.

Poetry.—On similar lines to the preceding classes. A general knowledge of a fair number of standard narrative poems should be expected. Poetry should be read aloud by both teacher and pupils. A minimum of one hundred lines of poetry should be committed to memory.

Spoken Language and Composition.—In addition to the continuation of the method used in Class VII, free conversation may now be given a large place in the work. The conversations on the subject matter of the readers should be of a more detailed character.

There should be brief reproduction of stories occurring in the readers. Original composition on interesting concrete subjects should be discussed, outlined on the black-board, and subsequently written. Description should now include description of games. Pupils should be set to get their own information unaided—to use books or works of reference.

The usual business and formal letters; the answering of enquiries and advertisements, and telegrams, should be taught.

Grammar should include the following:—Names and functions of the parts of speech. Familiarity with elementary terms as subject, object, singular, plural, active, passive, auxiliary. Idiomatic use of common words and phrases. Words in common use with different functions. Correct use of prepositions.

Relation of phrases and sentences. Turning statements into questions and questions into statements. Similar action with commands.

Punctuation and paragraphing.

Special differences between the English and the Vernacular grammar, (*e.g.*, time values of the tenses).

Correction of grammatical errors.

CLASSES IX AND X.

Head Masters should draw up their own Syllabuses for Classes IX and X guided by the Syllabus for the Matriculation Examination of Calcutta University which shows what is required at the end of the High School course.

The following should be kept in mind when drawing up the Syllabuses:—

(1) Some reading aloud, but much silent reading under the supervision of the teacher. Both prose and poetry should be included.

(2) Much practice in simple conversation in order to speak English with correct pronunciation and with some degree of facility, and to understand it when spoken.

(3) The writing of composition and essays on subjects within the powers of the pupils. The language should be simple and not "lofty"; grammatical correctness and facility should receive attention. Headings should sometimes be given on the black-board, but pupils should be encouraged to collect their own information from books or from works of reference.

(4) Letters should be written in correct and idiomatic English of a simple character. They should deal chiefly with the practical affairs of life.

(5) Preference should be given to a training in the English language rather than in English literature—as a preparation for the future professional or commercial duties of the pupils.
(6) Translation of both kinds should be practised as a preparation for future professional or commercial duties. Special attention should be given to simple idiomatic English.
(7) Some direct instruction should still be given in correct spelling.
(8) Little attention should be given to complex grammatical rules. An accurate knowledge of English will be produced rather by careful practice in reading, writing, and speaking English than by mere knowledge of grammatical theory.

Syllabus B.

This Syllabus is alternative to Syllabus A: either Syllabus may be used according to the preference of the Head Master, and according to his teaching facilities.

The general principles governing the construction of Syllabus B are:—

(1) That it is important that a Bengali boy should be enabled to read English with ease and enjoyment at as early a period of his school career as possible.*
(2) That the child's progress in reading should always be somewhat ahead of his progress in speaking and writing, in order that he may become accustomed to the meaning and correct use of new words and phrases in his reading, before he makes use of them in speaking and writing.

* See "Bilingualism—with special reference to Bengal" (Government of India Occasional Reports, No. 13)

(3) That progress in reading tends to be more rapid than progress in speaking and writing. (The course in reading is, therefore, kept separate from the course in speaking and writing so that the child may not be retarded in the former, nor hurried in the latter.)

Allocation of Periods.—The periods available for English should be so allocated between the course in reading and the course in speech and writing that the progress of the children in reading should always be in advance of their progress in speech and writing.

Grammar.—The Grammar Syllabus is the same as in Syllabus A. (Teachers are recommended not to devote more time to grammar than is justified by the resulting gain in accuracy of speech and writing.)

CLASS III.

CLASSES IX AND X.

Head Masters will frame their own course guided by the Syllabus for the Matriculation or School Final Examination.

Silent reading should be encouraged both in and out of class.

Practice in conversation should be continued. English debates on simple subjects. Oral composition should be done as a preparation for written composition.

Essays. Substance-writing in English. Translation.

Letter-writing.—In written work the pupils should be taught to aim at writing a little correctly rather than a great deal incorrectly. Every mistake should be carefully noted by the individual pupil in order that it may never be repeated. Every pupil should possess a dictionary and should be allowed to use it at all times. (There should therefore be no excuse for spelling errors.) The teacher's aim should be to *prevent* errors, and pupils should be encouraged to ask, whenever they are in doubt as to the correctness of an expression, before committing it to writing.

SYLLABUS IN BENGALI FOR SECONDARY SCHOOLS OF BENGAL.

CLASS III.

Reading.—A fairly large vocabulary and some facility in reading have already been acquired in the primary stage. In this class, much individual reading aloud, correction of mispronunciation of words and insistence on clear utterance are required. Meanings of difficult words and expressions should be given, and individual readers should be questioned about the portions read. There should be pattern reading by the teacher; and at the end of each lesson, members of the class should give a summary in their own words of what they have read.

One or more supplementary readers should be selected for rapid silent reading. The teacher should occasionally test this reading by means of a few questions.

Poetry.— A number of poems should be selected and read aloud by teacher and pupils. The meaning of every word need not be explained, but the leading ideas of each poem should be understood. A minimum of 40 lines of poetry should be learnt by heart.

Speech Training and Composition.—Simple conversations about familiar objects and actions, and topics of the reading lessons; stories told by the teacher, and retold by the class; and verbal descriptions of pictures shown to the class. New words from the readers should be used in simple sentences. The pupils should be encouraged to ask questions so as to show in what way their vocabulary needs supplementing.

Transcription from the black-board and from the readers. Spelling of words in the readers.

Dictation of words and sentences previously learnt in the readers. The average length of a piece of dictation should be six lines.

Easy written composition on concrete and simple subjects, *e.g.*, accounts of common sights and experiences, descriptions of pictures, and reproduction of stories. The pupils should possess a fairly complete stock of ideas about a subject before beginning to write.

Great stress should be placed on simplicity of language.

Commas and full stops should be required.

Grammar.—Parts of a sentence. Nouns, verbs, pronouns, adjectives and adverb (without sub-classification) and their uses in simple sentences. Examples of simple স্বরসন্ধি (combination of vowels) and the connected rules.

CLASS IV.

Reading.—On similar lines to Class III. Much individual reading aloud is desirable in order to correct mispronunciation of words and to secure reasonable fluency. The essential quality to be secured here is clear utterance.

Pupils should give briefly and in their own words the substance of the passages which they have read.

There should be at least one reader for detailed study and reading aloud. At least two others should be provided for rapid and silent reading under the teacher's supervision. The teacher should also read aloud stories and interesting extracts to the class.

Poetry.—Poems should, of their kind, be first-rate. A number of simple poems should be read aloud by teacher and pupils during the year. At least 60 lines of poetry should be learnt by heart.

Speech Training and Composition.—The simple conversation, composition, dictation, transcription and spelling should be continued as in Class III, but in a more advanced way.

Great stress should be placed on simplicity of language.

Grammar.—Revision of previous grammar in connection with more difficult sentences. Number and gender of nouns and pronouns. Formation of common feminine forms of nouns and of adjectives. Numerals and ordinals. Adverbs and their uses in sentences. The conjugation of the chief tenses of verbs. More difficult cases of স্বরসন্ধি and ব্যঞ্জন সন্ধি। Easy examples of principal kinds of কারক and বিভক্তি। Uses of অব্যয়।

Translation.—Easy short paragraphs selected from the English text-books into simple Bengali.

CLASS V.

Reading.—Individual reading aloud will be continued. Special attention should still be given to correct pronunciation, clear utterance and proper intonation.

Oral summaries of passages read aloud should now be of a more connected and continuous character.

The teacher should still frequently read aloud to the class in order to assist the members in improving their standard of reading.

There should be at least one reader for detailed study and reading aloud; and at least two others for more rapid and silent reading under the supervision of the teacher. The silent reading should be tested both orally and by means of written exercises.

Poetry.—The treatment in Class IV should be continued with more difficult poems. The central idea of each poem should be understood by the class. At least 80 lines of poetry should be learnt by heart.

Composition.—The possession by the pupils of a good stock of ideas about a subject before they begin to write is of great importance. It is well for the pupil to collect their ideas and state them orally before beginning to write. The teacher should now do less talking, and allow the pupils to do more.

The written work should include summaries of lessons, simple narrative and descriptive compositions, and construction of sentences based on words and expressions from the readers.

Each composition should consist of several paragraphs, and each paragraph should have its own central idea. Great stress should be placed on simplicity of language.

Punctuation marks should be taught.

Time should still be set apart for the learning of spelling from the readers. The teacher should select paragraphs of about ten lines from the readers for dictation tests.

Grammar.—Revision of previous grammar. Further discussion of ব্যঞ্জন সন্ধি, chief kinds of সমাস. and their uses. Cases of nouns and pronouns. Comparatives and superlatives. Participles and gerunds. Change of voice. Conjugation of principal tenses. Simple ideas of অনুজ্ঞা। Enlargement of subject and predicate. Analysis of simple sentences.

Translation.—Short paragraphs from the English text-books into simple idiomatic Bengali. The result should not only be grammatical, but should read smoothly and naturally.

CLASS VI.

Reading.—As in Class V. In the case of the readers for detailed study, there should be full explanation of difficulties by the teacher, and connected accounts of what has been read by the pupils.

Silent reading under the teacher's supervision and testing of the knowledge thus acquired should be continued.

There should be at least one reader for detailed study and reading aloud; and at least three others for silent reading.

Poetry.—On similar lines to Class V. At least 100 lines of poetry should be learnt by heart.

Composition.—The pupils should collect their ideas about a subject beforehand, and state them orally before beginning to write. Fuller connected accounts of what the pupils have seen, heard or learnt should now be required.

The written composition should include descriptions, the invention and reproduction of simple stories, and practice in the use of easy idiomatic sentences. Exercise may also be given in the expansion of ideas contained in proverbs, and in the expansion of the same idea in different ways.

Letter-writing of a simple kind should be taught; home topics should be largely dealt with.

Instruction should be given in elementary points of arrangement and punctuation.

Great stress should be placed on simplicity of language.

Spelling of words in the readers and of the corrected forms of composition mistakes should be continued. Dictation of passages already prepared from the readers about 12 lines in length.

Grammar.—Revision of Sandhi and Samas. Rules of ণত্ব and ষত্ব। Formation of nouns from adjectives, and of adjectives from nouns. Cases of nouns and pronouns in greater detail. The extension of the predicate; compound and complex sentences; and noun, adjectival and adverbial clauses. Change of voice: conversion of sentences. কৃৎ and তদ্ধিত।

Translation.—As in Class V. Long sentences should be avoided.

CLASS VII.

Reading.—Reading aloud should be continued, but it should be of less frequent occurrence. Silent reading under the supervision of the teacher should be proportionately increased. There should be at least one reader for detailed study and reading aloud, and at least four others for silent reading. The silent reading should be systematically tested.

Each pupil should now possess a dictionary, and should use it constantly for the explanation of difficult words and phrases.

Poetry.—On similar lines to the preceding classes. A general knowledge of a fair number of standard narrative poems should be expected. Poems should be read aloud by both teacher and individual pupils. A minimum of 120 lines of poetry should be learnt by heart.

Composition.—This should now include descriptions of familiar scenes, subjects of topical interest or obtainable from observations, or from books within the pupils' reach; selections of these should be read out and criticised by the class. Exercises in the development of outlines.

The reduction of involved sentences into two or more easy ones; the expansion of ideas; and the construction of new sentences using words and expressions found in the readers may be dealt with. More difficult idiomatic sentences should be required.

Short easy letters about matters within the pupils' experience should be written.

Great stress should be laid on simplicity of language and on the proper arrangement of the composition.

Spelling of words from the readers and of the corrected forms of composition errors, and dictation of passages of about 12 lines should be continued.

Grammar.—Derivative nouns and adjectives in common use and sentences containing them. Change of voice. Causative verbs. Idiomatic use of common words and phrases. Exercises in word-building. Use of উপসর্গ, কৃৎ and তদ্ধিত।

Syntax of nouns, adjectives, pronouns and adverbs. Comparison of direct and indirect narration in Bengali and English.

Translation.—Comparatively long and difficult passages into idiomatic Bengali. The translation should not be rendered word for word; the phraseology should be altered, if necessary, but the result should really represent the thought of the original.

CLASS VIII.

Reading.—As in Class VII, but with more difficult readers. Reading aloud should still be continued, but to a less extent than in Class VII. The teacher should occasionally read aloud passages of special literary merit.

The time allowed for silent reading will be increased, but it will be carefully supervised and tested by the teacher. The aims should be to give pupils a liking for good books and the power of reading them intelligently and quickly.

The regular use of the dictionary should be encouraged. The importance of the clear understanding of the main ideas of a lesson in comparison with the explanation of difficult words should be borne in mind.

There should be one reader for detailed study and reading aloud; and at least four others for silent reading.

Poetry.—As in Class VII, with more difficult poems. Both teacher and pupils should still read poems aloud. A minimum of 120 lines of poetry should be learnt by heart during the year.

Composition.—General class conversation on the coming composition should be continued. Composition exercises should be varied and may include the summaries of lessons, expansion and condensation of ideas, descriptions of games, imaginary conversations, and stories made up from pictures. More difficult exercises in the development of outlines.

Pupils should be set to get their own information unaided, and to use books of reference.

Ordinary business and formal letters and the answering of enquiries and advertisements.

Grammar.—Derivative adjectives in common use and sentences containing them. কৃৎ and তদ্ধিত । Conversion of sentences from one form to another. *e.g.*, from simple to complek, from compound to complex, etc. Expression of ideas in a sentence in different ways. Use of the same word as different parts of speech. Common errors in speech. Differences between Bengali and English grammar. Accent, pauses, metre and grammatical peculiarities in connection with Bengali poetry. Simple figures of speech.

Translation.—Paragraphs from the English text-books should be rendered into idiomatic Bengali; simple Bengali sentences should be insisted upon; regular and systematic exercises should be given.

CLASSES IX AND X.

Head Masters should draw up their own Syllabuses for Classes IX and X guided by the Syllabus for the Matriculation Examination of Calcutta University.

The following should be kept in mind when drawing up the Syllabuses:—

(1) Reading aloud of standard pieces of prose and poetry by both teacher and pupils should be continued.

(2) Books for silent reading should be carefully chosen; the pupils are thus guided towards a taste for real literature.

(3) In silent reading, the pupils should acquire skill in the rapid extraction of meaning from the printed page.

(4) The writing of composition and essays should be on subjects within the powers of the pupils. The language should be of a simple character and grammatically correct. Headings should sometimes be given on the black-board, but pupils should be encouraged to collect their own information from books or from works of reference.

(5) Little attention should be given to complex grammatical rules. An accurate knowledge of Bengali will be gained more easily by careful practice in reading, writing and speaking Bengali than by mere knowledge of grammatical theory.

(6) Translation of both kinds should be practised as a preparation for future professional or commercial duties.

Drawing of parallel straight lines; measurement of angles of a triangle; construction of triangles, quadrilaterals, squares, and parallelograms. Finding the areas of rectangles with squared paper. Dividing a line into 2, 4 or 8 equal parts.

THEOREMS.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal.

If two triangles have two sides of the one equal to two sides of the other, each to each and also the angles contained by these sides equal, the triangles are congruent.

If two sides of a triangle are equal, the angles opposite to these sides are equal; and the converse.

If two triangles have three sides of the one equal to three sides of the other, each to each, the triangles are congruent.

If one side of a triangle is produced, the exterior angle is greater than either of the interior opposite angles.

CLASS VII.

PROBLEMS.

Bisection of angles, and straight lines.

Construction of perpendiculars to straight lines.

Construction of an angle equal to a given angle.

Construction of parallels to a given straight line.

THEOREMS.

Revision of the work done in class VI.

If two sides of a triangle are unequal the greater side has the greater angle opposite to it; and the converse.

Any two sides of a triangle are together greater than the third.

Of all straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

When a straight line cuts two other straight lines, if—

(1) a pair of alternate angles are equal, or

(2) a pair of corresponding angles are equal, or

(3) a pair of interior angles on the same side of the cutting line are together equal to two right angles.

then the straight lines are parallel, and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

CLASS VIII.

PROBLEMS.

Division of straight lines into any number of equal parts.
Construction of triangles and quadrilaterals with sufficient data.
Construction of a triangle equal in area to a given quadrilateral.

THEOREMS.

The sum of the angles of a triangle is equal to two right angles; and the two corollaries thereto.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangle are congruent.

If two right-angled triangles have their hypotenuses equal and one other side of the one equal to one other side of the other, the triangles are congruent.

The opposite sides and angles of a parallelogram are equal; each diagonal bisects the parallelogram; and the diagonals bisect one another.

If there are three or more parallel straight lines and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

CLASS IX.

PROBLEMS.

The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the fixed points.

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

To bisect a given arc of a circle.

Construction of tangents to a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data.

THEOREMS.

If a straight line drawn from the centre of a circle bisects a chord which does not pass through the centre, it cuts the chord at right angles; and the converse.

There is one circle and only one which passes through three given points not in a straight line.

Equal chords in a circle are equidistant from the centre; and the converse.

The angle at the centre of a circle is double of an angle at the circumference standing on the same arc.

Angles in the same segment of a circle are equal; if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on a circle.

The opposite angles of any quadrilateral inscribed in a circle are supplementary, and the converse.

The angle in a semi-circle is a right angle; the angle in a segment greater than a semi-circle is less than a right angle; the angle in a segment less than a semi-circle is greater than a right angle.

In equal circles or in the same circle (1) if two arcs subtend equal angles at the centre they are equal; (2) conversely, if two arcs are equal they subtend equal angles at the centres. In equal circles or in the same circle, if two chords are equal they cut off equal arcs; and the converse.

The tangent at any point of a circle and the radius through the point are perpendicular to another.

The perpendicular to the tangent at the point of contact passes through the centre.

The two tangents to a circle drawn from an external point are equal; they subtend equal angles at the centre.

If two circles touch, the point of contact lies on the straight line through the centre.

If a straight line touch a circle and from the point of contact a chord be drawn, the angles which the chord makes with the tangent, are equal to angles in the alternate segments.

CLASS X.

PROBLEMS.

To bisect a triangle by a straight line drawn through a given point in one of the its sides.

To trisect a triangle by straight lines drawn from a given point in one of its sides.

Construction of a triangle equal in area to a given rectilineal figure.

On a given straight line to describe a segment of a circle which shall contain an angle equal to a given angle.

THEOREMS.

Illustrations and explanations of the geometrical theorems corresponding to the following algebraical identities:—

$$k(a+b+c) = ka+kb+kc \ldots\ldots\ldots\ldots$$
$$(a+b)^2 = a^2+2ab+b^2$$
$$(a-b)^2 = a^2-2ab+b^2$$
$$a^2-b^2 = (a+b)(a-b)$$

The square on one side of a triangle is greater than, equal or less than the sum of the squares on the other two sides according as the angle contained by those sides is obtuse, a right angle, or acute. The difference in the case of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

If two chords of a circle intersect either inside or outside the circle the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

The medians of a triangle are concurrent.

The perpendiculars from the vertices of a triangle to the opposite sides are concurrent.

Head Masters should draw up their own Syllabuses for Classes IX and X, guided by the Syllabus for the Matriculation Examination of Calcutta University, which states that the courses in History shall include "a Reader on the History of England and a Reader on Indian History with special reference to Bengal, including a short account of the administration of British India and of the progress of India under British rule."

The following should be borne in mind when drawing up the Syllabuses:—

(1) The aim should be to present a solid amount of definite historical knowledge, developing the sense of time and laying more stress on relationships of cause and effect as the pupil grows older.

(2) The treatment of the subject should be of a continuous nature.

(3) A text-book should be used and every pupil should posses a a copy. The teacher will pass lightly over certain parts, emphasise others by more careful treatment, and from his greater knowledge and more certain insight, introduce much explanation and illustrative matter orally.

(4) The text-book need not be read in class; the teacher will in his treatment of the matter keep fairly close to the order and context of the successive paragraphs.

(5) The teacher should set portions of the text to be read at home in advance, with questions set to keep the attention of the boys on what is of real importance. The actual lessons should be devoted to exposition, by a mixture of lecturing and questioning, of what the boys have read.

(6) Recent history should not be taught by reigns. Some teachers make use of connected stories under such heads as "The Growth of the Empire." Others teach through the lives and careers of the men who played a principal part in them, *e.g.*, the growth of the Moghul through the life and work of Akbar.

4. The pupils might collectively construct all the models comprising a railway station including railway sleepers and rails, signals, platforms, booking and station offices, gates, bridges, locomotives and rolling stock. A small part might be carried out by each pupil on a predetermined scale, and the whole finally pieced together.

The same idea might be applied to a market place, village street, etc.

CLASS VII.

1. The syllabus for this year should be chiefly concerned with wood strip work and should have a bias towards carpentry so as to be introductory to the carpentry courses of the following three years.

2. Models should, however, be constructed involving a use of all the materials of construction used in the preceding years. Any other suitable and available materials may also be pressed into use such as wood; thin turned metal sheets which can be cut and manipulated almost as easily as cardboard and joined at the edges by folded seams; and sheet glass which can be easily cut and used for windows. Portland cement and sand may be used in the walls of model houses, bridges, etc.

3. The following models are suggested:—

2. The drawing should be confined to plans, side views, sections and isometric projections; and the drawing course should be so arranged as to develop these in order of difficulty. The pupil should be taught to use only the minimum number of views necessary (*e.g.*, an article may possibly be completely represented by a dimensioned isometric projection only).

3. The use of the following should be demonstrated: —

Bench, footrule, steel rule, carpenters' pencil or mark knife, bench vice, tenon saw, rip saw, trysquare, benchsquare, trying plane, jack plane, smoothing plane, mallet, firmer chisels, marking gauge, bradawl, carpenter's hammer, screwdriver, gimlet, glass paper, straight edge.

Pupils should not be allowed to sharpen their own tools in this course.

4. The making of definite models or woodwork articles should not be attempted by pupils until they have become familiar with the use of the above tools. They should be given simple wooden test pieces about 12 to 15 inches long, and an inch or two in cross sectional dimensions. These pieces should always be a little longer than the dimensions intended for the finished piece and should be rough sawn only.

1. The use of the few remaining carpenters' tools should be learnt, and the test pieces should consist of simple woodwork articles. The pupils should work from dimensioned drawings supplied to them. They should also be required to measure a few woodwork articles, draw their measurements to scale, and make reproductions of them.

2. The chief remaining carpenters' tools are as follows: —

Shooting board, wing compass, spokeshave, wood files and rasps, brace and bits, cramps, gauges, bow saw and rabbit plane, dovetail saw, nail punch, mortice chisels, holdfasts, grindstone, water and oil stones.

3. The test pieces or models should also include the operations of glueing and pinning joints, the use of wire and screw nails, countersinking, panelling and cutting out designs with fret or bow saw, chamfering, beading and grooving.

4. The pupils should be shown how to grind and sharpen their tools, and keep them in order.
